"Products That Identify"

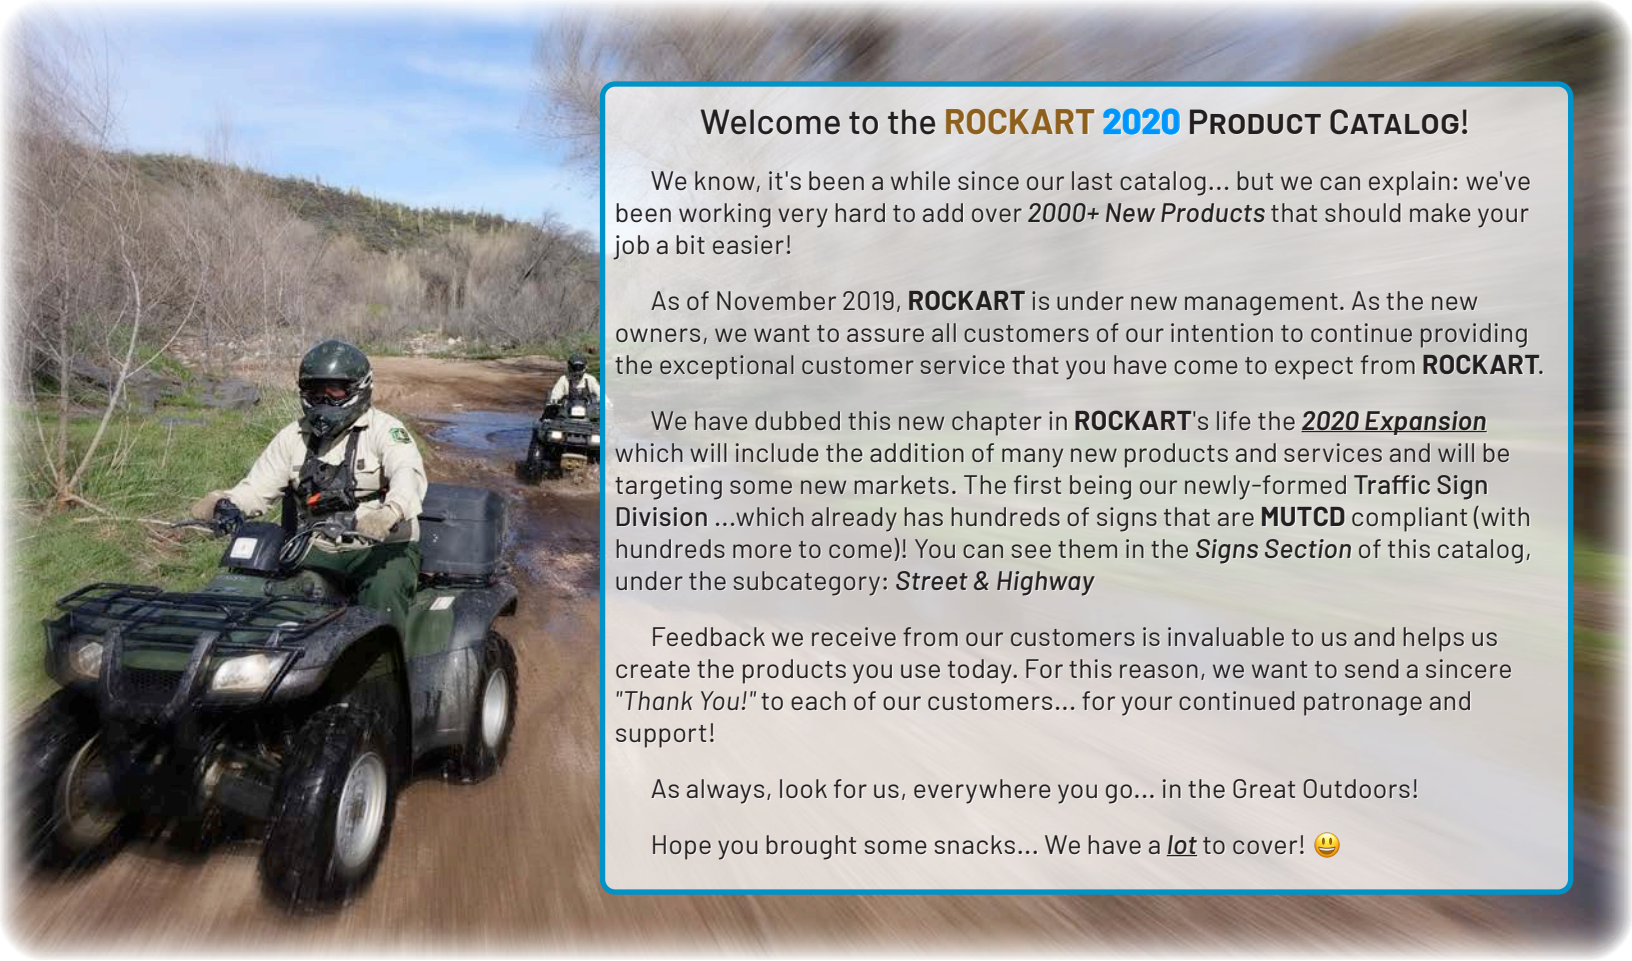
PRODUCT 2020 CATALOG

OVER 2000+ NEW PRODUCTS INSIDE!

- All *2009 Revised Recreation* symbols are now available as Decals and Signs!
- Full library of **MUTCD Compliant** Street & Highway Signs!
- We now carry **EZ Kut**™ tools!
- And much more inside!

PROUDLY SERVING

SINCE 1997!



Welcome to the ROCKART 2020 Product Catalog!

We know, it's been a while since our last catalog... but we can explain: we've been working very hard to add over *2000+ New Products* that should make your job a bit easier!

As of November 2019, **ROCKART** is under new management. As the new owners, we want to assure all customers of our intention to continue providing the exceptional customer service that you have come to expect from **ROCKART**.

We have dubbed this new chapter in **ROCKART**'s life the ***2020 Expansion*** which will include the addition of many new products and services and will be targeting some new markets. The first being our newly-formed **Traffic Sign Division** ...which already has hundreds of signs that are **MUTCD** compliant (with hundreds more to come)! You can see them in the *Signs Section* of this catalog, under the subcategory: *Street & Highway*

Feedback we receive from our customers is invaluable to us and helps us create the products you use today. For this reason, we want to send a sincere *"Thank You!"* to each of our customers... for your continued patronage and support!

As always, look for us, everywhere you go... in the Great Outdoors!

Hope you brought some snacks... We have a ***lot*** to cover! 😃

Important Tips for Using This Catalog

Before ordering, be sure to check for and read any special instructions (usually highlighted with a light yellow background) that explain how to correctly determine the Item# for the specific variation you want.

Retroreflectivity Indicators

The symbols & abbreviations below are used throughout this catalog to indicate levels of retroreflectivity:

- **EG** or **Engineering Grade** (lowest rating)
- **HIP** or **High-Intensity Prismatic** (medium rating)
- **DG** or **Diamond Grade** (highest rating)
- **SEMI** or **Semi-Reflective** (some reflective elements)
- **NREF** or **Non-Reflective** (not reflective)

As a general rule, retroreflective products should be used:

- *Wherever motorized vehicles come in contact with non-motorized restrictions, warnings, closures, boundaries, limited access and where directions are given.*
- *On non-motorized trails (i.e., reassurance markers) to guide users back to a trail head using a flashlight after dark.*
- *Where encroachment or night violations into wilderness areas or road closures may help local magistrates prosecute violators.*
- *Wherever maximum longevity is required.*

Retroreflective decals and signs cost more, but typically have a reflectivity lifespan of 7-10+ years, depending on conditions. Many of these decals and signs may actually last even longer, but the retroreflectivity will diminish over time.

Non-Reflective material is less expensive, but will typically last 5-7 years, depending upon exposure.

Selecting higher grade materials for new installations will usually be more cost-effective in the long run. Replacing deteriorating low-quality decals on existing fiberglass marker posts with new decals, can be time-consuming and tedious. We recommend reflective materials for these reasons.

Specifying Color Attributes

If an Item# contains **##** or Color, it is a "place holder" used to specify the color of the item. Replace **##** or Color in the Item # with the 2-digit code representing the color you wish to order. Check individual product details to know which colors are available.

Products Sold 'By-the-Inch'

Item #'s with '**LL**' in them should be replaced with the desired length (usually in inches) you wish to order. To calculate the cost of the item, multiply the **LL** value by the price/inch shown.

Letter & Number Decals

A "_" or Char within an item#, represents the single letter or number "place holder" used to specify the letter/number you want. Simply replace _ in the item # with a single ***UPPERCASE*** letter (A - Z) or numeral (0 - 9) you want to order.

Specifying Size & Dimension

Item #'s containing SIZE or DIMS are used as placeholders to specify the SIZE (or DIMensions) of the sign you wish to order. For SQUARE sizes, only one measurement is needed. For Non-square (rectangular) Wide or Tall sizes, both dimensions are combined together like: 1830 for 18" wide x 30" high.

Example: Replace Size (in the part number) with 6 to order the 6x6 size, or 18 for the 18x18 size, etc.

To order a 24" x 18" size of a Wide rectangular sign, replace DIMS in the part number with 2418; or to order the larger 30" x 24" size, use 3024 instead.

Product Images

Images of products are not scaled down to a specific percentage and therefore should ***not*** be used to compare actual sizes of other products in this catalog. Please *verify* Width & Height before ordering.

For example: In the Decals section, you will see 3x3 and 4x4 decals shown right next to each other and they appear (visually) to be the same size. But after checking below each decal, one will notice that they are very different sizes.

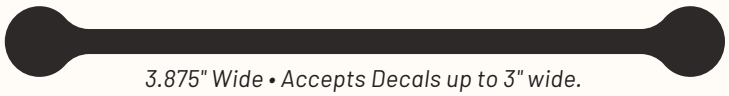
54" Campground Marker Posts (DF54-01)

Our exclusive 54" campground markers meet U. S. Forest Service standards. Decals and reflective sheeting (up to 3" wide) may be applied. With its ***Medium*** flexibility rating and bottom end precut into a "V" shape, it can be driven into the ground using a campground post driver such as #**08-153**. This post is also perfect for marking open spaces and construction sites.

- Conforms to U.S. Forest Service Standards for campground identification

Learn more about ***ROCKART Pre-Installation Services*** on *Page 9*.

Recommended installation depth is 16". Weight: 0.47 lb/Ft



3.875" Wide • Accepts Decals up to 3" wide.

ROCKART® SIGNS AND MARKERS

Phone: 480-854-3400
Fax: 480-832-6390
Toll-Free: 877-718-7446

*Our '**ROCKINITE**' composite marker posts, made from Fiberglass Reinforced Polyester (FRP) are often used to display strip decals.*

***ROCKINITE**s offer many features: They offer easy ground-driven installation and years of maintenance-free service. Reinforced glass fibers aligned in BOTH longitudinal and traverse directions extend life of the product and minimize possible delamination in abusive environments. **UV** (Ultra-Violet) stabilizers are added to help resist color fade.*

Some post profiles support the addition of small signs and snow poles. All profiles allow easy ground-driven installation and are formulated to resist Mother Nature's effects and survive vehicular impacts.

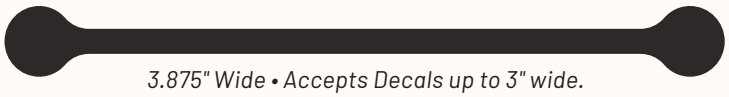
All Ground-Driven markers come with one end pre-cut into a V-shaped point, and install easily using standard Post-Driving Tools (#08-103, #08-146, #08-160, #08-153 and #08-136) on Page 20.

Dual-Flex (DF)

The ***industry standard*** marker post used to mark secondary roads, campsites and trails. Apply decals and/or reflective sheeting up to 3" wide onto front and/or back sides (use each side to communicate with visitors travelling in opposing directions). Rated as medium flexibility, it installs easily with standard drivers. It is also compatible with our ***Snow Pole Brackets***, and anchors may be installed on one or both sides.

Recommended installation depth is 16". Weight: 0.47 lb/Ft

*See Full Product Brochure on **Page 198***



3.875" Wide • Accepts Decals up to 3" wide.

Glas-Flex (GFX)

This post is more impact resistant than the ***DUAL-FLEX*** or ***TRI-FLEX*** designs and is the most flexible. Standard 3" wide decals may be applied to one side. Additionally, the flat-sided center spline is designed to stiffen the post and allows for simple 2-rivet installation to attach small signage without needing spacers. Installs with standard post drivers. Compatible with optional ***Rock-Flex anchors*** and snow pole brackets.

Recommended installation depth is 16". Weight: 0.45 lb/Ft

*See Full Product Brochure on **Page 200***

3.85" Wide • Accepts Decals up to 3" wide.

ROCKART SIGNS AND MARKERS

Online: www.RockartSigns.com
Email: Sales@RockartSigns.com

Tri-Flex (TF)

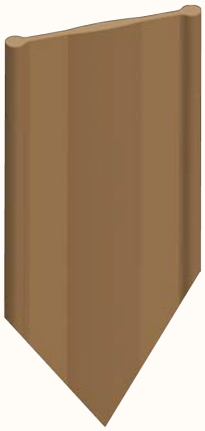
Slightly different from the original design, with radii on the center stiffening rib to decrease stress. It exhibits increased durability for high traffic areas. Decals and reflective sheeting up to 3" wide may be applied to the front side and are protected by the ribbed edge design.

With the added rigidity, the ***TRI-FLEX*** post can be driven into most soil types and will permit the addition of optional ***Snow Pole Brackets*** with any style snow pole. An anchor may be installed on the front side.

Recommended installation depth is 16". Weight: 0.43 lb/Ft

*See Full Product Brochure on **Page 203***

3.75" Wide • Accepts Decals up to 3" wide.



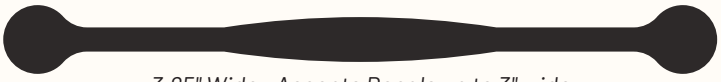
Flex-Tough (FT)

Our newest marker post is an industry standard used in marking underground utilities such as gas, petroleum, water, sewer, electric and communications. Its thicker midsection on both sides for easier installation into hard soil surfaces. Standard 3" wide decals may be applied to one or both sides.

Compatible with our optional #08-112 ***Rock-Flex anchors*** (on one or both sides) and our snow pole brackets. Installs using standard post driving tools. Currently, we stock only Brown (■ -01). Other colors are available for large quantity orders. Call for details!

Recommended installation depth is 16". Weight: 0.57 lb/Ft

*See Full Product Brochure on **Page 199***



3.85" Wide • Accepts Decals up to 3" wide.

Need Help Selecting a Driver? The "Best Practices" section has helpful tips and product selection guides. See Page 226.

Marker Post Anchors

When installed into topsoils such as sand, decomposed granite, clay, wet or boggy areas, Marker Posts may need added protection against vandalism / theft.

We have two different types of anchors and each are available in Single- or Double-sided kits. Double-sided anchor kits may be installed on some post profiles (***DF*** and ***SPM***) for additional holding power and security.

If you are ordering Marker Posts and Anchors at the same time, consider having ***ROCKART*** pre-install them for you! See ***Page 9***.

Rock-Flex Anchor

ROCK-FLEX anchors are low-price and are molded from durable high impact plastic and feature spring-back memory and stiffening ribs. Hardware is included. A double-sided anchor kit is also available (#08-112-2).

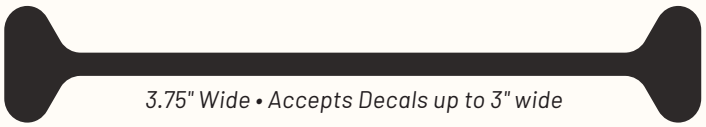
Sign Post Marker (SPM)

The ***Sign Post Marker*** profile is the most rigid product of our fiberglass marker post products, designed to resist the additional wind loads associated with the attachment of popular oversized aluminum or composite signage. Its significant stiffness also supports attachments of tall snow poles for demarcation in heavy snowfall areas. At 3.75" wide, it will accept decals/reflective sheeting up to 3" wide on one or both sides.

Optional ***Rock-Flex Anchors*** or ***Flex-Flange Anchors*** can be installed on one or both sides. Use a compatible post driver for ground installations. Other colors are available for large quantity orders.

Recommended installation depth is 16".
Weight: 0.58 lb/Ft

*See Full Product Brochure on **Page 201***



3.75" Wide • Accepts Decals up to 3" wide

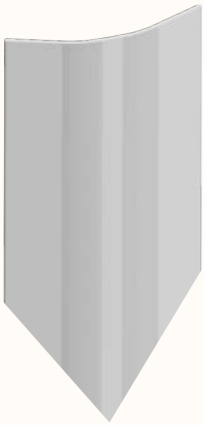
Available Colors

00 White 01 Brown



Arc-Tec Marker (AT)

This marker post can accommodate decals and reflective sheeting up to 4" wide. When packing into remote areas, this post is the lightweight champ.

Its thinner profile provides more flexibility when impacted on the convex side and should help minimize potential damage to the post and vehicle. This post installs using standard post drivers and soil preparation techniques.

If theft is a concern, consider securing with ***Arc-Tec Stainless Steel Anchors***, below. Economically priced, the ***Arc-Tec*** profile is an excellent trail marking product. Other colors are available for large quantity orders.

Recommended installation depth is 16".
Weight: 0.21 lb/Ft

*See Full Product Brochure on **Page 197***

Single-Rib Boundary Marker (SRBM)

Our 2.62" wide ***Single-Rib Boundary / Survey Marker*** profile will accept decals up to 2.5" wide. This lightweight post can be carried into remote locations and is can be installed manually with lighter weight drivers.

The singular rib provides rigidity and permits installation of anchors on the front side.

We currently stock Orange and Brown. Other colors are available for large-quantity orders. Call for details!

Recommended installation depth is 16". *Weight: 0.35 lb/Ft*

See Full Product Brochure on Page 202

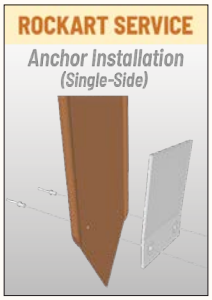
ROCKART Pre-Installation Services

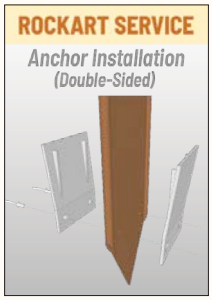
ROCKART offers the pre-installation services listed below: Applying decals, Anchor installation, or Pre-drilling holes, etc. So when you receive your items, they are ***ready to use*** (or at least a bit closer to being ready)!

If considering a pre-installation service, remember that your order must also include any & all products required to perform the service.

When ordering pre-drilled holes, your order must include Marker posts [to be drilled]. For pre-application of decals or reflective sheeting, the order should include Marker Posts ***and*** all decals/sheeting you wish to have applied.

Example: Let's say you order 10 Marker Posts and wanted them numbered sequentially from 15 to 24 using our 3x4 number decals, your order would need to include those 20 decals (two for each post) and also a quantity of 20 for the Pre-apply Decal service (#**00-0021**) (one for each decal to be pre-applied).





ITEM #	ROCKART SERVICES	PRICE
00-0034	*Have 2 holes pre-drilled for later installation ROCKART Anchors*	1.30 / POST
00-0020-AN-1	*Install a **Single-Sided** anchor kit on a post (Anchor kit not included)*	2.30 / POST
00-0020-AN-2	*Install a **Double-Sided** anchor kit on a post (Anchor kit not included)*	+ 2.50 / POST
00-0021	*Pre-apply a single decal / reflective strip (Decals sold separately)*	+ .40 / DECAL

Tree Huggers™

A ***ROCKART Tree Hugger*** may be used in areas where vandalism or theft are a problem and trees are available for signage. Available sizes from 6" to 48" tall should handle most groups of decals/reflective sheeting. Colors are white or brown

Tree Huggers are constructed from brown or white FRP material shaped to conform to the curvature of a tree.

Includes a pre-drilled hole at each end for the included deck screws or aluminum nails for easy mounting.

Accommodates decals up to 4" wide.

*See Product Brochure on **Page 208**.*

4.125" Wide • Accepts Decals up to 4" wide

Wood Post Markers

Wood Post Markers are used to display decals on 4 x 4" wood posts. They are available in various pre-cut sizes starting at 6" up to 48" to accommodate most decal / reflective sheeting combinations up to 3" wide.

Holes are pre-drilled for the included Tamper-Resistant ***square drive screws*** through a stiffening rib on the back side of the post. When ordering, add 2" to the actual decal length you need to allow room for the pre-drilled holes.

Mounting Hardware included:

Round Washer Head , Square Drive Wood Screw (#08-750)

*See Full Product Brochure on **Page 209**.*

v.20.0107

U-Channel Post Markers

Fiberglass Reinforced Polyester (FRP) like our other marker posts, the ***U-Channel Post Marker*** allows you to display strip decals on 2 pound, steel U-channel posts. A wide range of lengths (6 to 48") will accommodate nearly any combination of decals / reflective sheeting up to 3" wide.

Two holes are pre-drilled (one at each end) on one inch centers. ***Mounting hardware is not included.*** We recommend using either #08-800 or #08-808. You may also want to order the specially drilled Hex Key, #08-619 for #08-800, or the POP SET PS15 Rivet Tool, #08-600 for #08-808.)

We recommend ordering a length that is 3" taller than your decal(s) to leave room for the pre-drilled holes. Discounts available when ordering 100 or more units.

U-Channel Post not included, but are sold separately, see ***Page 19***.

*See Full Product Brochure on **Page 210**.*

Folia Markers

Folia Markers are an affordable, easy way to communicate additional information at specific points of interest along a trail or other attractions. Communicate information like...

- Extended information about plants or animals that can be found in the area (species / family name, etc.)
- Awareness to possible dangers that may be present (i.e., poisonous plants, predatory animals, etc.)
- Reminders about allowed / prohibited activities.

These clear polycarbonate enhancements are 3/16" thick and angled at 20° to make the experience more viewer-friendly. They feature smooth (rounded) corners; are available in 4 heights: 3-, 6-, 9- and 12-inch tall (depending on the total height of your decal content).

They install easily onto any flat side of a ground-driven Marker post using the included Pop Rivets. (Note: 2 holes are required near the top of the marker post for proper installation)

*See Full Product Brochure on **Page 216**.*

ROCKART SIGNS AND MARKERS

Phone: 480-854-3400
Fax: 480-832-6390
Toll-Free: 877-718-7446

Multi-Facet Decal Display Markers

Designed for use with U-Channel or 4 x 4 Wood Posts, our Multi-Facet Decal Display Markers are formed from 3/16" thick clear polycarbonate and provide "decal-friendly" surfaces for displaying decals to users approaching from up to three different directions. Available in two different widths compatible with 3" or 4" wide decals. Heights range from 6-48"; in 1" increments, so they can handle most strip decals or grouping of individual decals.

Each unit has 2 pre-drilled holes (.375" dia.; one at top & bottom end, on 1" centers). Mounting hardware is not included and is sold separately (see below).

To leave enough room for the pre-drilled holes and mounting hardware at the top and bottom, we recommend adding 3" to the total height of the decal(s) to be displayed.

Decide how many display surfaces are needed (1-Way, 2-Way or 3-Way), the width of decals being displayed (3" wide or 4" wide), and the height of the Sign Blank (6" to 48"; 1" increments)

U-Channel Post, 4 x 4 Wood Post, Mounting hardware & Decals are not included and are sold separately.

Recommended Mounting Hardware & Installation Tools

U-Channel Installation

08-800	Threaded T-Nut Fastener
08-619	Hex Key for installing 08-800
08-808	Double-headed Aluminum Pop Rivet
08-600	PS15 POP Rivet Tool for installing 08-808

4 x 4 Wood Post Installation

08-1048	1/4 x 1 Hex Head Lag Screw, Steel, Zinc
08-759	5/16 ID x .75 OD Flat Washer (for 1/4" Bolt)

See Full Product Brochure on Page 211.

U.S. PAT No. 401,879

#02-101-1

#02-101-1

- Unique hooded design helps protect against elements
- Economical and easy bonding for fast installation
- Design makes installations tamper resistant
- Tough, rigid, lightweight and impact resistant
- Excellent choice when other signing methods are not available

Marker Shrouds

Rockart Marker Shrouds provide an alternative to using fiberglass markers. Shrouds cost less and need less maintenance.

The included ***back plate*** serves two purposes; the *smooth* side provides a surface that is receptive to decal application. ABS Cement (#08-701) applied to the *textured* side allows it to permanently bond to the interior of the marker shroud preventing access to the mounting screws.

These Marker Shrouds are small, compact, lightweight and nest together and stow nicely in a backpack for installation in remote areas. The plastic includes a resists ultra violet rays, helps shield the decal from weather, is unassuming and matches the predominate color of a pine tree. These markers may be installed higher up on a tree above heavy snows and left year-round to aid in trail grooming and winter trail events.

Choices for mounting hardware listed below.

-X	Mounting to:	Description
-1	Tree	#8 x 2.5" Deck Screw, Philips Head + Washers
-2	Wooden Post	#8 x 1.25" Deck Screw, Philips Head + Washers
-3	Fiberglass Post	3/16 x .440 Rivet, Blind

ITEM NO.	DESCRIPTION	1-100	101-250	251+
02-101-X	3" Single Shroud	3.50	3.00	2.75
02-107	3" Single Shroud replacement back plate	.75		
02-106	7" Double Shroud replacement back plate	1.00		
08-701	Half Pint ABS Cement	3.50		

REMINDER: *Replace* **X** *at the end of the item number with* **1**, **2** *or* **3**, *indicating your choice of included mounting hardware (See above).*

Easy 5-Step Installation:

1) ***Screw*** shroud to a tree. Allow room for tree growth.
2) ***Apply*** decal to smooth side of provided ABS plate.
3) ***Apply*** ABS Cement to inside of shroud.
4) With decal visible and correctly oriented, ***Press*** ABS plate firmly against surface of cement-coated shroud.
5) ***Hold*** in place for 1 minute.

Toll-Free: 877-718-7446

ROCKART *composite snow poles allow trail and roadway demarcation for motorists, cross-country skiers, snowshoers, snowmobiles and snow removal crews. Our snow poles are designed for ground-driven installations or for mounting to pre-existing signs / marker posts.*

They are available in 4 popular profiles and various lengths to achieve the highest compatibility. Manufactured with UV stabilizers to help minimize color fading. All Snow Poles feature rounded edges for safety and ease of use with our ***Snow Pole Brackets*** *(Page 18) and* ***Snow Pole Receivers*** *(Page 17).*

Strips of Reflective Sheeting can be applied for added visibility (Page 91).

SP18

Measuring 1.25" x 3/16", this snow pole design offers more flexibility and lighter weight for back country trail marking. Ideal for marking areas with snowmobile, cross country or downhill skiing activity. Two flat surfaces allow reflective sheeting to be applied to both sides for increased visibility. These snow poles may be mounted to composite marker posts using our ***Snow Pole Brackets*** on *Page 18*.

Weighs .180 lb/ft. Available only in Orange.

SP31

This Quasi-Elliptical profile measures 15/16" x 5/16" and is more rigid than our ***SP18*** snow pole at the same price. Additionally, the flat area is designated as a mounting surface, able to accept widely available fasteners for quick installations. Visibility can be enhanced further by wrapping a piece of reflective sheeting all the way around the pole. (Pricing shown below.)

Weighs .174 lb/ft. Available only in Orange.

Sold Individually

LENGTH	SP18	SP31	1-39	40-239	240-519	520+
4'-0" (48")	SP1848-03	SP3148-03	5.28	4.80	3.36	CALL

SP25

Measures 1.25" x .25" and is more flexibile than our ***SP38*** product, but more rigid than our ***SP18*** family of snow poles.

Weighs .231 lb/ft. Available only in Orange.

LENGTH	SP25	1-29	30-209	210-389	390+
4'-0" (48")	SP2548	6.60	6.00	4.20	CALL

8'-0" (96")	SP2596	13.20	12.00	8.40	CALL

SP38

The ***SP38*** is designed for maximum stiffness (1.25" x .375") to accommodate added height and is ideal for marking along highways. They may be mounted to guardrails or compatible fiberglass Marker Posts with Rockart ***Snow Pole Brackets*** (*Page 18*), or driven directly into the ground. Reflective strips may be applied to one/both sides for better visibility (see *Page 91*).

Weighs .346 lb/ft. Rockart ***Snow Pole Receivers*** are on *Page 17*.

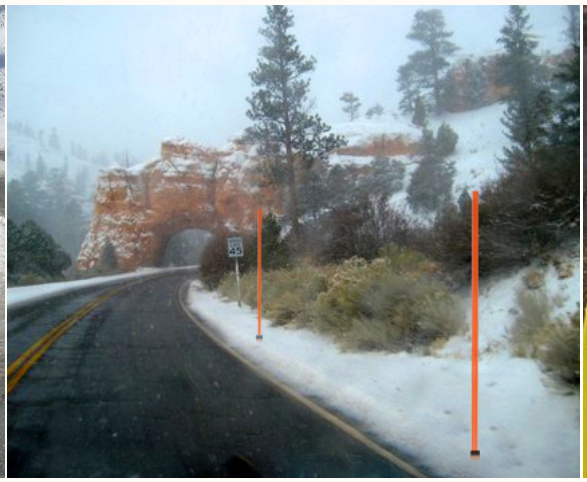
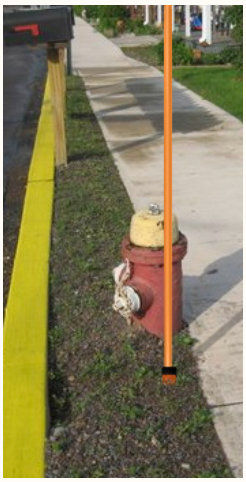
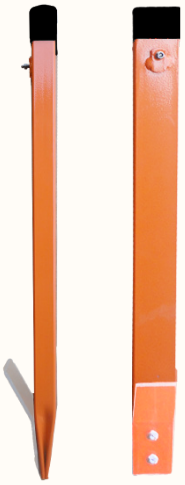
v.20.0107

*ROCKART's **Snow Pole Receivers** offer features that save time & money when it is Snow Pole season!*

- *Shorter deployment & retrieval time for Snow Poles means less exposure to possible traffic hazards*
- *Open-bottom design allows rain water to drain off*
- *Tapered base allows easier ground-driven installation*
- *Included black plastic cap can be used to keep debris out while not in use (during the off-season)*







Ground-Driven Snow Pole Receiver

Made from heavy-gauge rectangular steel tubing and are pinched to a wedge at the bottom to help secure the pole when it is present. They also feature a tough anchor riveted above the wedged bottom. This helps ensure the receiver can be left in the ground all year long.

We recommend leaving at least 2 inches of the receiver sticking out of the ground so that it can be seen easily. A black vinyl cap is included to help keep dirt and water out while the snow pole is removed. This receiver comes in two versions: #**03-591** includes a stainless steel locking set screw located on the back to help further secure the snow poles in areas where theft is a concern. #**03-590** comes without a locking set screw. The pinched end (bottom) is left open just enough to allow rainwater to escape.

Installation and retrieval of snow poles requires no special tools, no clamps, no cable ties or bolts and thus minimizes installation time. (Applies to #**03-590** only)

Each receiver is powder coated orange for durability, longevity, visibility and is virtually maintenance free.

Pilot Hole and Receiver Drivers are sold separately and are on *Page 20*.

See full Product Brochure on Page 214

With Locking Set Screw	Without Locking Set Screw
03-591 ..... 10.60	03-590 ..... 8.85

Surface-Mounted Snow Pole Receiver

This receiver can be attached to nearly any vertical surface, including wooden guard rail posts, and 1# or 2# steel U-Channel posts, delineators, etc.

Made from heavy-gauge rectangular steel tubing with the bottom 2 inches forming a nearly-closed wedge that will help secure the pole when it is installed. This makes your fiberglass snow pole installation & retrieval much easier.

Each receiver is powder coated orange for durability, longevity, visibility and is virtually maintenance free. The tapered bottom end is left slightly open to allow rainwater to escape.

This receiver comes in two versions: #**03-593** includes a stainless steel locking set screw located on the back to help secure the snow poles in areas where theft is a concern. If you don't require this, part #**03-592** comes <u>without</u> a locking set screw.

Installation and retrieval of snow poles requires no special tools, no clamps, no cable ties or bolts and thus minimizes installation time (applies to #**03-592** only).

See *Page 91* for Reflective Sheeting strips.
U-Channel Post not included and sold separately, see *Page 19*.

Use chart below to find a bracket compatible with your Snow Pole/Marker Post combination!

*Use **ROCKART Snow Poles** & **Snow Pole Brackets** when marking highways, back country roads, and snowmobile trails for safety and visitor reassurance.*

- ***Super Compatible*** - Brackets for 3 families of snow poles: **SP18**, **SP31** and **SP38**. Installs on either side of five marker posts.
- ***Economical*** - Reusable each year.
- ***Durability*** - Brackets are made of stainless steel, eliminating corrosion.
- ***Aesthetics*** - Clean, durable appearance without covering reflective sheeting and trail marking decals.
- ***Deters Theft*** - Stainless steel hex drive screws achieve a higher level of resistance to tampering.
- ***Easy to Use*** - Slide the bracket assembly over the marker post (on a compat. side), then insert snow pole into the bracket. Adjust to desired height. Use the included hex tool to secure everything in place.
- No Loose Hardware
- No Drilling or Alignment Required
- Adjusts easily for deeper snow levels *(for more stability, you can use 2 brackets spaced 6-10" apart)*

ROCKART Rib-Bak® 2 lb/ft, Steel U-Channel Posts

- 2 pound-per-foot standard weight
- Available in popular sizes: 72" (6'), 84" (7'), and 96" (8').
- The patented Rib-Bak® design supports signs mounted on the back of the post – without wobble.
- Tapered bottom means easier installation.
- 3/8" diameter holes along back on 1" centers.
- Shipped by freight truck.
- Available in 1 color: Brown
- Made from recycled, high carbon U.S. new-billet steel, Grade SP-80 making the Rib-Bak® the strongest U-channel post available.
- NCHRP 350 approved (National Cooperative Highway Research Program)
- FHWA crash-tested and approved.
- Yield strength is 80,000 -100,000 PSI, exceeding ASTM requirements.

See full Product Brochure on Page 213.

Sign Spacers

Our ***Sign Spacers*** sit right in the U-channel and support the sign from the back, preventing bending & bowing once installed. **For ROCKART 2-LB U-Channel posts, use #08-829.** Additional sizes (heights) are available for use with posts from other manufacturers.

See more solutions for mounting signs to U-Channel in our 'Best Practices' section on *Page 230*.

DIRECTIONAL & COLOR CODING

Decals with arrows showing directions to continue following along a pathway. If an area has multiple intersecting trails, colored backgrounds are commonly used to help users in following along their chosen trail.

Color Code Your Trails!

EG Reflective 3 x 3 decals are now available in your choice of 10 colors to make trail marking easier than ever.
Reminder: Don't forget to substitute '*Color*' in the Item # with the ***2-digit number*** that represents the color you want (shown right).
Example: *Item **10-124-06** would be an arrow on a GREEN (06) background and cost $1.14.*

FLAGS

Decals bearing a USA flag or patriotic-themed message that may help to reduce the number of incidents of vandalism to public lands.

Reduce Vandalism on Public Lands

Many federal agencies have seen a drop in vandalism to some areas by simply applying these American flag decals to existing fiberglass marker posts, signs & kiosks.

These decals are great for construction or maintenance projects that use volunteer labor.

FEDERAL RECREATION SYMBOL DECALS

This popular decal category has now become a superset of Federal Recreation symbols with (of course) both permissive & restrictive variants and now ALSO includes ALL of the newer recreation symbols (rev. 2009) as well!

Service & Accommodation recreation symbols can be found in sub-category: Services / Facilities / Amenities

Item numbers for these updated Recreation Symbols (rev. 2009) start with **11-**.

In most cases, if you know the item number of an older-version symbol and want to order the updated version of it, simply replace **10-** *with* **11-** . ***Example:*** *The 2009 revised symbol for older item #***10-230** *would become #***11-230**.

Decals in this category are designed to be overlaid in blank zones of Travel Management Signs. They are divided into subcategories, based on their purpose or message type.

To view available Travel Management Signs, see the subcategory by that name in the Sign Section.

These 'fill-in-the-blank' signs come with a pre-printed basic layout with a thick border (inset slightly from the outside edge) and 2 to 4 major divisions (separated by thick lines) designated areas that can be customized, as needed, by the end-user.

These signs are used to specify activities / types of travel that are allowed and/or prohibited within an area. Some layouts have blank zones for including date ranges or to describe other applicable conditions.

ROCKART SIGNS AND MARKERS
Online: www.RockartSigns.com
Email: Sales@RockartSigns.com

Individual letters, numbers and punctuation symbols are essential for proper identification of campsites, trail & route numbers, mile post markers, equipment identification, and countless other uses.

We have four distinct sizes of individual letter & number decals available, and each has specific types of use. Most of our Letter/Numbers are typeset in white **HELVETICA BOLD** *font (upper case only) on a brown background printed edge-to-edge (bleed).*

They are screen-printed on Adhesive-backed 3M reflective sheeting using a special type of ink that allows the entire decal to be reflective.

Reminder: *When item # has a '_' shown, be sure to replace it with the UPPERCASE Letter (**A - Z**) or Number (**0 - 9**) you wish to order.*

3 x 4h Individual Letter & Number Decals

10-349-_

3 x 4 Individual Letter/Number Decals (A-Z, 0-9), Wht/Brn, EG

1-299	300-999	1000+
.80	.75	.70

Numerals 0-9 and Letters A-Z available with Engineering Grade (EG) reflectivity rating.

Cut Vinyl Letters, Numbers & Arrows

- Contour cut from reflective Engineering Grade (EG) vinyl with a strong adhesive backing. Not available in HIP.
- Sold as a strip containing 5 or 10 copies of a symbol A~Z, 0~9 or an arrow. (The 5" tall strips have 5 per strip, all other sizes have 10 letters/numbers/strip)
- All UPPERCASE alphabetic letters (A-Z), all numerals (0-9), and arrows are available in 5 different sizes ranging from 1-5" tall
- Choose from 7 standard colors
- Ready-to-install with our pre-applied "transfer tape" system. A 'low-tack' adhesive backing applied to the front side of the computer cut characters, allowing you to easily remove the backing; position it and apply it, without ever touching the adhesive. Once the letterform is positioned, you simply peel the premask material from the top.

Letters A-Z / Numerals 0-9

ITEM NO.	HEIGHT	AVAIL. COLORS	PRICE / STRIP
10-601-_-Color	1"	00 White 01 Brown 02 Yellow 04 Red 05 Blue 06 Green 09 Black	$3.50
10-602-_-Color	2"		4.50
10-603-_-Color	3"		6.00
10-604-_-Color	4"		8.00
10-605-_-Color	5"		10.00

REMINDER: Replace _ with the Letter (A-Z) or Numeral (0-9) you want. Replace Color in the Item# with the 2-digit code of desired color. Ex: **10-603-A-04** = Strip of 3" Tall, Letter "A", in Red (04)

Arrows

ITEM NO.	HEIGHT	AVAIL. COLORS	PRICE / STRIP
10-611-1-Color	1"	00 White 01 Brown 02 Yellow 04 Red 05 Blue 06 Green 09 Black	$4.50
10-612-2-Color	2"		5.50
10-613-3-Color	3"		7.50
10-614-4-Color	4"		9.00
10-615-5-Color	5"		10.50

REMINDER: Replace Color in the Item number with the 2-digit code of your chosen color. Ex: **10-611-1-01** Strip of 1" Tall, Arrows, in Brown (01)

These decals are frequently applied to fiberglass marker posts. For this reason, they tend to be quite tall and narrow. Popular widths for these decals are:

- *3" (used with most fiberglass marker posts)*
- *2.375" (used with Boundary & Survey markers)*

Note: Any product bearing an official U.S. Gov't Agency / Departmental logo is restricted from sale to or use by unauthorized persons/groups. For these products we may request that the buyer provide proof of Authorization.

Within each Strip Decal subcategory: Non-Agency or generic decals are usually shown first, followed by decals grouped by their agency affiliation (a small agency logo is used to show agency division)

BOUNDARY / ID

Strip Decals used to show precisely where a boundary line exists or for identification & labeling special areas / zones.

Junior learned early on how to work a crowd with his "Donkey Down" routine.
And no, he is not dead or injured, just adorable!

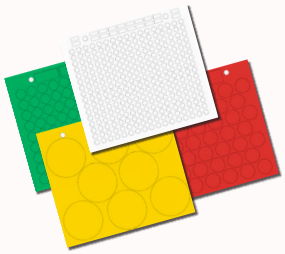
Pre-Cut Snow Pole Reflectors

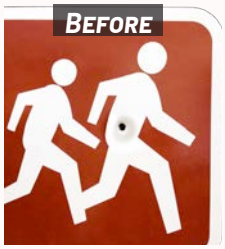
Designed to be applied to one or both sides of our **SP18**, **SP25** or **SP38** Snow Poles (see *Page 16*) without any additional cutting on your part.

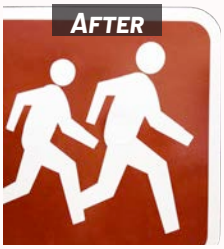
They measure 1" wide, and are available in 5 pre-cut lengths, as well as either in 3M Engineering Grade or 3M High Intensity Prismatic.

	ENG. GRADE (EG)		HIGH INTENSITY (HIP)		
LENGTH	ITEM NO.	PRICE	ITEM NO.	PRICE	AVAIL. COLORS
3"	10-710-3-Color	.24	10-715-3-Color	.48	00 White 02 Yellow 04 Red
4"	10-710-4-Color	.32	10-715-4-Color	.64	
6"	10-710-6-Color	.48	10-715-6-Color	.96	
9"	10-710-9-Color	.72	10-715-9-Color	1.44	
12"	10-710-12-Color	.96	10-715-12-Color	1.92	

REMINDER: When ordering, replace Color in the item number with the 2-digit code of the color desired.







Instantly Repair Unsightly Bullet Holes!

Now you can quickly cover up unsightly bullet holes and make your signs look nearly-new again!

- Easy to apply in the field, without having to disassemble the sign.
- Once applied, they are nearly invisible to the naked eye.
- Small enough to store in your vehicle in case you find a sign with a new hole.

These computer-cut circular dots are a perfect patch if you need to cover up those unsightly bullet holes in a sign. Each sheet of adhesive-backed, EG Engineering Grade vinyl also has pre-punched holes along one side so they can be easily stored away in any standard 3-ring binder.

The quantity of patches per sheet varies, depending on the diameter of the patch itself.

ITEM NO.	DOT DIAMETER	# DOTS/ SHEET	AVAIL COLORS	PRICE

10-646-Color	4"	4		

REMINDER: When ordering, replace Color in the item number with the 2-digit code of the color desired.

Clear Protective Edge Tape

Used to cover the weather-exposed edges of signs made of wood or plywood to keep them from deteriorating.

Also used to extend the life of any decal or graphic that is exposed to the elements. May significantly reduce the following issues resulting from exposure to environmental factors: edge peel, color-fading and reflectivity degradation.

07-180 .....75.00/Roll
3" wide x 150 Ft Roll of Transparent Protective Edge Tape (by 3M)

07-178 .....100.00/Roll
4" wide x 150 Ft Roll of Transparent Protective Edge Tape

Edge Sealer

Helps protect decal & sign edges against peeling in deep snow.

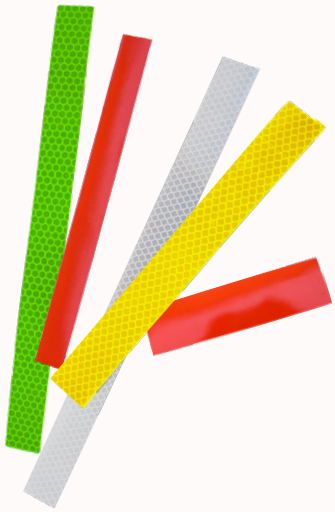
Perfect for enhancing visibility *of marker posts, driveways, trails, delineators, gates, cattle guards and even vehicles!*



Reflective Sheeting by the Strip...

When you order by the strip, we will be happy to pre-cut the sheeting into uniform strips of the desired length, up to 24" long.

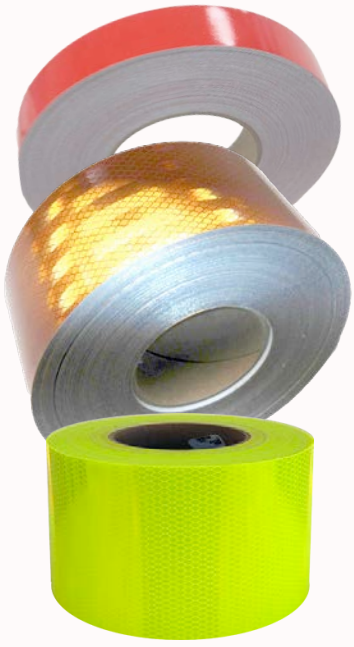
Ordering Reminder:

Replace '**Size**' in the item number with the desired length (in inches) and calculate pricing accordingly.

Also replace '**Color**' with the 2-digit code for the desired color (avail colors are shown to the right of each product in the table below; the 2-digit codes are shown at bottom of this page).

WIDTH	LENGTHS AVAIL.	REFLECT. GRADE	ITEM NO.	PRICE/ INCH	AVAIL COLORS
1"	3-24"	EG	07-201-Size-Color	.04	
2"	3-24"		07-202-Size-Color	.07	
3"	3-24"		07-203-Size-Color	.11	
1"	3-24"	HIP	07-205-Size-Color	.07	
3"	3-24"		07-207-Size-Color	.21	
1"	3-24"		07-213-Size-0206	.14	Fluorescent Yellow/Green
3"	3-24"		07-214-Size-0206	.42	
6"	3-24"		07-215-Size-0206	.84	

PRICING NOTE: *This product is sold by the inch. So take the strip length (Size) you want and MULTIPLY it by the number in the PRICE/INCH column.* ***Example:*** **07-207-12-02** *is the item# of a pre-cut strip that is 3" wide by* **12**" *long of YELLOW High-Intensity Prismatic (HIP) reflective material and would cost* ***$2.52*** *each (12 x .21)*



...or 'Buy' the Roll!

Purchasing a roll of sheeting can save a lot of $$, especially if you are unsure about the lengths you may need. Sometimes its easier to buy a roll, and simply measure & cut strips from it "as-you-go"!

Unless stated otherwise, each ROLL of Reflective sheeting below is 50 Yards long (150 Feet).

WIDTH	REFLECT. GRADE	ITEM NO.	PRICE/ ROLL	AVAIL COLORS
1"	EG	07-151-Color	25.00	
3"		07-153-Color	75.00	
1"	HIP	07-155-Color	48.46	
3"		07-158-Color	145.38	
1"		07-159-00	106.25	
3"		07-161-00	318.75	
6"		07-164-0206	605.00	Fluorescent Yellow/Green

REMINDER: *When ordering, replace Color in the item number with the 2-digit code of the color desired.*

v.20.0107

SIGN SECTION

ROCKART *signs are manufactured using the highest quality materials available at an affordable price point. This allows us to offer our customers a wide range of cost-effective choices when considering factors such as life expectancy, durability, rigidity and retro-reflectivity rating.*

ITEM NUMBER NOTATION FOR SIGNS

When you see an item # containing the notation ***-SIZE*** *, this indicates that it is a Square- ■ or Diamond-shaped ◆ sign (where width & height are equal). To order a specific size, simply replace -Size with the size you want. (Example:* #**10-136-8** *would indicate the 8"x8" size of a sign)*

Likewise, an item # containing the notation ***-DIMS*** *indicates the sign is a Rectangular-shape (i.e., Width & Height are NOT EQUAL) and will have either a Tall ▮ or Wide ▬ orientation. The* ***-DIMS*** *part of an item # represents the Width & Height of the sign. Example: To order a 30w x 24h size of the* #**91-167** *"Emergency Parking Only", you would use the item* #**91-167-3024**

USING PRICE TABLES

If a sign is only available in a few specific sizes, they will be listed in the text below the product image, along with dimensions and price.

If a table reference is given, such as "See Table: AL-1", you should refer to the the specified Pricing Table (following 2 pages) to review the available sizes and other details, including pricing.

A description preceeding each pricing table should provide clarification as to which signs it applies.

Sign Substrate Materials

Below is a list of sign substrate materials (and available thicknesses) that we use to manufacture signs. To the left of each one, is a symbol used to indicate each material in this catalog.

AL	Aluminum	(.032, .063, .080 or .125)
CG	Corrugated	(3mm)
HDPE	High-Density PolyEthylene (Routed Plastic)	(.75")
MG	Magnetic	(.030)
PC	Polycarbonate	(.188)
PF	PolyFlex	(.050, .070, .110)
DB	Di-Bond	(3mm)
SN	Sintra	(3mm)

Focus on Retroreflectivity

The images above and descriptions below, provide a more in-depth look at the different grades/ratings of **3M**® brand retroreflective sheeting we use to manufacture our signs and decals.

EG or **Engineering Grade** is the lowest-rated (default) retroreflectivity and is primarily for use in areas that have lower-volume traffic / slower-speed areas (i.e., Biking / hiking trails).

HIP or **High-Intensity Prismatic** is the popular choice for areas that frequently experience medium-volume traffic moving at medium-speeds (i.e., surface streets within a city).

DG or **Diamond Grade** is the highest-rated retroreflectivity and is used primarily for travelways that regularly have high-volume and/or fast-moving traffic i.e., Freeways, Expressways, Highways, etc.

NREF or **Non-Reflective** should be used ONLY for signs or decals that are not required to be retroreflective.

Choice of retroreflective sheeting may affect the price of a sign or decal.

ROCKART SIGNS AND MARKERS

Phone: 480-854-3400
Fax: 480-832-6390
Toll-Free: 877-718-7446

Signs used for marking objects in the roadway or marking the end of a street or road.
+ Barricade signs are typically used to close off a street/road
+ Signs for diverting traffic around road hazards.
Note: Some signs in this category may NOT be MUTCD compliant!

Solid Color Object Markers

These single-color Object Markers are on .080 AL Aluminum with radius corners, and with EG ***Engineering Grade***, HIP ***High-Intensity Prismatic*** or ***Diamond Grade*** reflective sheeting applied to one or both sides.

SIZE	SIDES	REFLECT. GRADE	ITEM NO.	PRICE	AVAIL COLORS

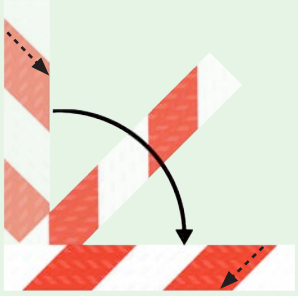
Fast Facts About Left-to-Right

If the designations '***Left-to-right***' & '***Right-to-left***' seem confusing to you ... you are not alone. To understand this directional dilemma, start at the high point on a stripe edge, and follow it down to the lowest point, as shown in the examples to the left.

While it might ***seem logical*** that by simply rotating a marker 180° would reverse its designation, this is not the case.

However... rotating a vertical marker 90° (i.e. making it horizontal), you may notice that ***Left-to-Right*** becomes ***Right-to-Left***, and vice versa. To make it a bit less confusing, we also offer double-sided barricade & object markers, with Left-to-Right on one side, and Right-to-Left on the other... *So one side will always be the right one!*



Phone: 480-854-3400

Email: Sales@RockartSigns.com
v.20.0107

ROCKART's barricade markers feature 3, 4 or 6-in. wide alternating red & white stripes and are on .080 Aluminum, unless otherwise noted. All sizes and stripe direction designations are based on vertical orientation, if you need to display the sign in a horizontal position, you will need to take this into consideration when ordering. Please see ***Fast Facts About Left-to-Right*** *(opposite page).*

Barricade Markers

Commonly used to mark the end of a road or other path of travel; they can be installed onto gates / fences to serve as a visual indicator that a route or area is closed.

Our Barricade Markers are available in 3 popular sizes, 2 reflectivity grades and all are AL Aluminum. ***Double-Sided*** markers are identified in the table (below) with 'DS' in the Direction Column.

SIZE W x H	STRIPE WIDTH	REFLECT. GRADE	DIR	ITEM NO.	PRICE

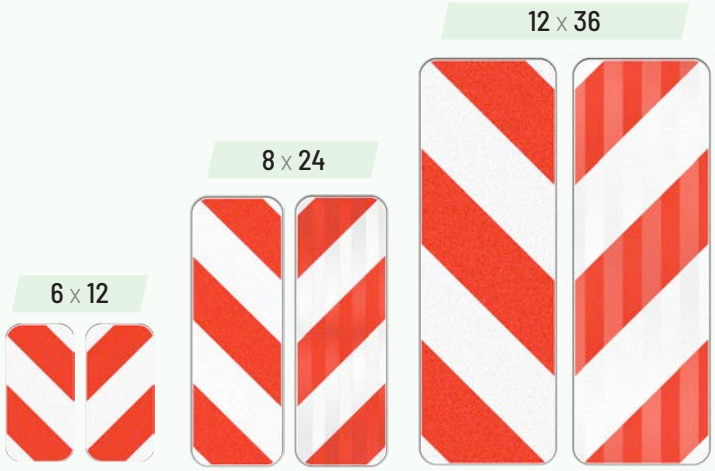
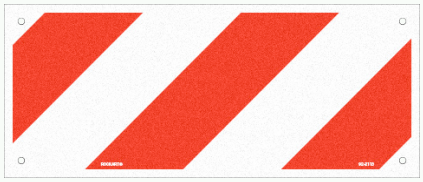
			DS	90-961	62.00





Cable Visibility Markers

Blocking a driveway or other passageway with a thin cable/chain across the entrance can be very dangerous if someone trying to enter doesn't see the cable or chain blocking it. Hanging these markers (using hog rings) along the cable or chain will make them more visible.

They are 12 x 5 x .070 PF **PolyFlex** with the front screen printed in EG and includes a protective UV overlaminate, while the back side is covered with solid White, Reflective Sheeting (EG)

Each corner has 1 hole for attaching with Hog Rings, see *Page 177* (Sold separately).

FEDERAL RECREATION SYMBOL SIGNS

Complete selection of signs bearing Federal Recreation symbols including permissive and prohibitive versions, and all newly-revised 2009 symbols.

Check the 'Services / Facilities / Amenities' subcategory (sign section) for related symbols.

About 2009 Revised Symbols...

Item #'s for newer Recreation Symbols (rev. 2009) start with **11-**.

In most cases, if you have an item number of an older-version symbol and want to order the newer version, simply replace **10-** *with* **11-** . ***Example:*** *For older item #***10-136-8** *(no campfires), the 2009 version would become #***11-136-8**.

RECREATION | GENERAL

Signs bearing one of the 'General' group of Federal Recreation Symbols. Includes all permissive & prohibitive versions; original & revised (2009) symbols.

MUTCD STREET & HIGHWAY SIGNS

*As part of our **2020 Expansion**, **ROCKART** is proud to announce our new Traffic Sign Division that will include Street / Highway signs that are **fully compliant** with specifications published in the **Manual on Uniform Traffic Control Devices (MUTCD)**.*

***ROCKART** item #'s within this special group of compliant signs all begin with **91-**.*

*To remain compliant and unless noted otherwise, signs in this subcategory are available ONLY in **High-Intensity Prismatic** or **Diamond Grade** reflectivity and are .080 AL (Aluminum). Signs measuring 36" or more in either width or height are on .125 AL (Aluminum).*

*Consult the **MUTCD** (and applicable State/City/Municipal directives) to determine the proper size/dimensions for each sign needed. Signs may not be available in every size or configuration listed.*

Finding Signs by their MUTCD Identifiers

*If you are viewing a downloaded Adobe® PDF copy of this catalog or you are using the **ROCKART** website, you can search for a sign by its **MUTCD** identifier (**Example:** A STOP sign is **R1-1**).*

*For help using the search function in **Adobe® Reader**, please refer to the Help section within the application.*

Can't locate the MUTCD sign you need?

The list of signs in this new section of our catalog is not exhaustive. We will be adding hundreds more in a concerted effort to eventually have the entire MUTCD library available. Always check our website for the most up-to-date offerings.

STREET & HIGHWAY | REGULATORY

Includes signs from MUTCD chapters on Regulatory Signs (Series R), and Barricades

91-100- AL / HIP

Travel Management Signs *are used to control the various types of travel through or within a particular location, area, trail, road, etc. These signs typically have multiple "blank zones" in which same-sized decals may be overlaid (applied directly to the face of the sign) thus building a cohesive message.*

Some of these signs are 'pre-populated' and are ready for use. Others are mostly empty except for tiny 'corner marks' that highlight each blank zones wherein a decal can be applied.

Any decal used to fill a blank zone to these signs should match the size of the zone, covering it completely. When looking for decals that are compatible with these signs, check the following subcategories (in the Decal Section of this catalog) :

- *Restricted / Permitted Travel / Activities*
- *Date Ranges or Conditions*
- *Reasons for the Restrictions/ Closures*
- *Difficulty Levels*

See the example below to learn how to create a Customized Travel Management sign!

Creating a Customized Travel Management Sign

1. Select a ***Travel Management Sign Blank*** (see following page) that best matches the size & layout requirements of your application.
2. Browse our extensive library of decals and strip decals to compose your messaging as needed. Don't forget to use decals that show permitted / restricted activities when applicable.
3. After your order arrives, it's a good idea to do a 'dry-run' by laying the sign blank on a flat, clean surface, face up. Place each (unapplied) decal over each zone you intend to cover. Check to ensure your message is clear, and will be understood, as intended.
4. If everything is good to go, simply apply each decal into its respective zone (as previously planned in the last step). Use the tiny corner marks around each zone as a guide to ensure they are applied straight.
5. Your Customized Travel Management Sign is ready to install!

ROCKART® SIGNS AND MARKERS

Online: www.RockartSigns.com
Email: Sales@RockartSigns.com

ROCKART® Message Center Kiosks *are manufactured locally by our team of professionals using high-quality materials and are always* ***Built to Last****!*

Full-sized kiosks will accept 1 to 4 Sign Panels, arranged in a straight or angled layout. We also have 4-sided Kiosk models.

Choose from three roof styles: Shed, Gable or No Roof. Most roofed Kiosk models can be ordered with the option for simulated green or brown shingles to give it a cabin-like aesthetic.

Add new capabilities to any new or existing installation with ***ROCKART® Add-on Accessories****.*

Compatible with ***ROCKART® Message Center Sign Panels*** *(sold separately, see* ***Page 164****).*

Built to Last!

- Vertical Supports (legs) made from:
  5x5 or 6x6 (.188" thick) Steel-Tube
  -or-
  .375" thick FiberGlass (for **Coastal** Kiosk models)
- Powder Coat finish (Rust Texture) on all exposed surfaces for durability and longevity*
- Slotted Steel sign panel mounting tabs allow mounted sign panel to expand/contract as seasonal temperatures change
- **ROCKART®** Sign Panels (sold separately, see ***Page 164***)
- **Coastal** Kiosk models are corrosion-resistant*
- Tamper-Resistant mounting hardware
- Can withstand most small-to-medium caliber firearms (damage sustained is often cosmetic)
- Environmentally Friendly: Made using mostly recycled materials and is partially recyclable*

Kiosk Sign Panel Features & Options

- Sign Panel base material (substrate) options:
  - **HDPE** *(default material)*
  - **BioMass**
  - **GlasRoc**
- Single or Double-Sided displays
- Graphic content can be swapped out in 15 minutes or less
- Tamper-Resistant Features*
- Content secured using special Key* (included)
- Content is fully enclosed (protected on all sides)*
- UV Protective Laminate for Graphics* (optional)
- Graffiti-Resistant Laminate Overlay* (optional)
- Routed Text for Header/Footers* (optional)

Additional Features / Options

- *Optional:* Simulated Shingles (in Brown or Green) for Roofed models*
- *Optional:* Ask us how you can collect Visitor Fees securely with a *built-in* ***Kiosk Rock Ranger*** Fee Collection Box!

Post-Installation Add-On Accessories

- Inform/Engage visitors with printed maps/literature with an ***Add-on Brochure Box***!
- Track Visitors with an ***Add-On Registration Box***!
- Keep visitors informed of important usage rules and current information

Installation & Maintainence

- Touch-Up Paint available
- Replacement parts are always kept in stock
- Well-written, fully-illustrated guide makes installation & maintaining easy
- Installation Support by phone/email
- Ask about **ROCKART®** Kiosk Installation Service

Options to Consider Before Ordering

By first deciding the sizes (dimensions) and count of Sign panels your project requires, will make choosing remaining options easier (because some options are mutually exclusive).

- Compute the size requirements of the content to be displayed:
  - Choose a sign panel size that can contain content
  - How many sign panels: 1, 2, 3 or 4
  - Will you need to display content on both front & back sides?
- Select a suitable Kiosk floorplan/layout:
  - Straight (inline)
  - Angled
  - 4-Sided (square)
  - Single-Post
- Select a Roof Type and Shingling Options
  - Shed, Gable or Non Roof
  - Shingle Colors: Brown or Green
  - Roof Aesthetics: Simulated shingling or Plain?
- Would your kiosk benefit from any of these Options/Add-ons?
  - Integrated Fee Collection Box (build option)
  - Fee Envelope Storage (Add-on)
  - Guest Registration Box (Add-on)
  - Comment/Suggestion Box (Add-on)
  - Brochure/Literature Box (Add-on)

**Applies only to specific models*

Important Kiosk Installation Note

ROCKART* strongly recommends** using our ***3 piece Aluminum Assembly Fixtures during kiosk installation. They are used as temporary "place holders" for each sign panel. They maintain critical spacing between posts and help to secure the kiosk in place during installation. They weigh much less than actual kiosk sign panels and are easier to handle.

Don't risk possible injury to the installers or damage to your Kiosk Sign Panels!

***ROCKART* will refund the Security Deposit (less shipping costs) back to you once the fixture(s) have been returned back to ROCKART (in usable condition).** *For this reason, please retain the original shipping boxes!* **See *Page 169* for details.**

Use **ONE** Assembly Fixture **PER** Kiosk Sign Panel.

Sign Panels not included – See Page 164.

Important Kiosk Installation Note

ROCKART strongly recommends using our 2 piece Aluminum Assembly Fixture to aid installation of Non-Roof kiosks. They maintain critical spacing between posts and help to secure the kiosk during installation. They weigh much less than actual kiosk sign panels and are much easier to handle. See *Page 169* for details.

Don't risk possible injury to the installers or damage to your Kiosk Sign Panels.

Use ONE Assembly Fixture PER Kiosk Sign Panel.

Coastal Kiosks™

Corrosion Resistant & Built to Last!

ROCKART, Inc. has a family of Message Center Kiosks designed specifically for coastal regions! They're *Built to Last* using materials that are unaffected by the corrosive effects of sea water.

The vertical supports are made from a .375" thick Fiberglass tube.

Roof panels and mounting plates for these kiosks are made from Aluminum, so they will not rust.

Since these kiosks are typically installed in areas with less dense topsoil, a rebar anchor is included to help secure the kiosk in place.

Compatible with **ROCKART®** *Single-Post Kiosk Sign Panels* (sold separately).

*Add new features / capabilities to your existing **Message Center Kiosk** installation with these Add-On Accessories from **ROCKART®**!*

Most of these Add-Ons may be ordered with a mounting bracket compatible with 3, 4, 5, 6, 8" wide Steel-Tube posts or a 3.5" wide for 4x4 Wood Posts (measure the width of the target post before ordering). Replace 'Size' in the Item number with -3,-4,-5,-6,-8 or -3.5

All units include Tamper-Resistant fasteners and Install Guides!

*Each Add-On/Accessory includes the same Powder Coat finish (Rust texture) as our **Message Center Kiosks**, so they will NOT look like an afterthought and will look good for many years to come.*

Brochure Box Add-Ons

All Brochure Box Add-Ons feature oversized, slanted & hinged lids that help protect stored items.

Mounting bracket sizes compatible with:
- 3, 4, 5, 6, 8" wide Steel-tube post; or
- 3.5" (aka 4x4) Wooden post.

Includes Tamper-Resistant installation hardware.

Made from 1/8" thick steel, with a durable Rust-Texture Powder Coat finish.

*See Full Product Brochure on **Page 188** !*

Registration Boxes

Track Visitors to a Site/Trail or other Attraction

For storing a 3-ring binder Registry for visitors to sign upon arrival! May brochures, forms, handouts etc. The large 14.75 x 14.25" slanted, hinged lid is ideal for adding an optional ***Call-to-Action*** or reminder message (see examples, below).

This rugged 1/8" thick steel Registration Box comes in two versions:

1. **Ground-installed, Stand-alone model** (#03-547)
2. **Kiosk Add-On** (#03-710-SIZE) with mounting bracket sizes available:
   - 3, 4, 5, 6, 8" wide Steel-Tube posts or
   - 3.5 (for 4x4 wood posts)

All models include Tamper-Resistant fasteners.

The standard finish is a brown, rust-textured powder coat, which matches our ***Message Center Kiosks*** and will keep looking great for many years to come!

*See Full Product Brochures on **Page 186** and **Page 187** !*

PEDESTAL SIGN DISPLAYS

by ROCKART®

Built to Last! Engaging Good Looks... *(it's OK to stare!)*

Also known as "Interpretive Signs", they are the perfect solution for presenting semi-permanent signage presented in an accessible and engaging way. These attractive, super-rugged displays will only accentuate well-designed content while capturing the attention of visitors passing by.

See Full Product Brochure on Page 185

Call 877-718-7446 for Pricing & Available Options

Framed Mount Pedestal Sign Displays

Our ***Framed Mount*** displays can have a single or dual 5x5 Steel-tube supports and display content at a 30° angle. These models include a separate, fully-enclosed aluminum frame that protects content on all sides*. Sign content (and any protective cover) up to 7/16" thick will fit into this display. This frame is then secured to the pedestal base. This is a great way to display extended information, historical detail or interesting obscure facts!

03-532-Dims-Legs

Reverse Mount Pedestal Sign Displays

Our ***Reverse Mount*** displays can have a single or dual 5x5 Steel-tube supports and display content at a 30° angle. These models feature an angled steel mounting plate with through-holes. A sign printed on/applied to a rigid substrate (Aluminum, Polycarbonate or High-Pressure Laminate) can be attached using multiple strips of VHB (Very High Bond) double-sided tape or directly bolted to the mounting plate. Perfect for displaying extended information, historical detail or interesting side notes!

03-530-Dims-Legs

Surface Mount Option for Above-Ground intallations is available (add "A" after the part #)

**To protect the face of the sign, we recommend using reverse-printed polycarbonate signs or placing a size-matched sheet of clear polycarbonate on top of the graphic before sliding it into the frame*

Wire Gate Closing Device (Device to boost leverage when closing a wire gate), Incl. Hardware

This leverage-boosting device makes it easier to securely close the gate of a barbed-wired fence (also known as a Texas or Western Gate). Someone passing through a gate with this device installed, can use it to gain the added leverage necessary to bring the the wooden posts together so it may be closed/secured properly. The 3 foot long chain serves as an "adjustable loop" and installs easily in just minutes. It includes a hammer-in staple so it can be anchored to the stationary side of the gate and also 2 "S-hooks" used to hold the white handle in place horizontally, while not in use.

Available in handle sizes of 18" or 24" long; the longer one allows even more leverage for extremely hard-to-close gates.

See the Full Product Brochure on Page 219

03-818-18 ..... $23.00

Signicade Deluxe "A-Frame" Portable Sign Stand - Displays two 24 x 36 signs up to 3/16 inch thick (signage not included)

Quick Change feature allows changing the displayed content in seconds
No maintenance necessary
Displays two 24 x 36 Signs up to 3/16 inch thick (Coroplast is recommended)
No need for fasteners like tape, Velcro®, or screws!
Once opened to full position, hinges lock to prevent over-extending the two panels
Stay Tabs on sides hold signs in place.
Sign stand has built-in weights totaling 20 lbs
Up to 10lbs of additional weight may be added by removing the plugs along the sides and adding 5lbs of sand to each side.
Built-in formed handle (top) makes it easy to carry and handle.
Small mounds & dimples on front and back allow stacking displays vertically

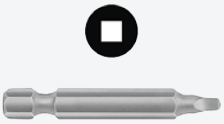
1/4" Hex Shank, Tip #2, 1" Length

08-624.....$2.50

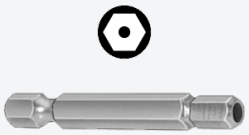
5/32 Hex Socket Insert Driver Bit

08-621.....$4.62



#1 Tip , Square Drive Recess Power Tool Bit

08-772 ..... $1.14



Tamper-Resistant Hex Bit 1/4" Hex Shank for Power Tools, 7/32" Hex Size, 2" Long

An opening at the tip accommodates the pin in the recess of tamper-resistant hex screws. These are also known as pin-in-hex or pin-in-socket bits.
Hex shank bits for power tools have a groove in the shank and fit directly into power tools without an adapter. They offer more reach for recessed holes and less wobble compared to a hex shank bit used with an adapter.

08-626.....$5.00

3/16 Hex Driver Power Tool Bit, Drilled

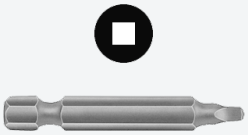
08-618.....$4.62

5/16 Hex Nut Driver Bit for Power Drills

08-639.....$3.50

7/16" DeWalt Pilot Head Titanium Power Drill Bit

08-646..... $21.50



#1 Tip, 2" Long Square-Recess Power Tool Bit insert, For #5-#7 Screws (1/4" Hex Shank)

08-629..... $1.30

13/64 Solid Carbide, Straight Flute Drill Bit, for Power Tools .203" Diameter, #6

Used for drilling holes in fiberglass posts before installing Rock-Flex or Flex-Flange Anchors
Harder, stronger, and more wear resistant than carbide-tipped steel, solid-carbide bits maintain their sharp edges longer. They require rigid toolholding to prevent breakage and should not be used in hand-held drilling applications. The straight flutes withstand the heavy pressure necessary to penetrate hard steel. They are short length, also known as screw machine or stub length, which provides maximum rigidity for drilling straighter holes than jobbers'-length drill bits.
Drill bits with a carbide shank have the strength and rigidity to drill steel with a Rockwell hardness up to C45.

Drill bits with a four-facet or split point keep centered without a pilot hole.

08-633.....$34.25

PEDESTAL SIGN DISPLAYS

BUILT TO LAST! *ENGAGING GOOD LOOKS* *(... IT'S OKAY TO STARE!)*

ITEM#: **03-530-**[DIMS]-[OPTIONS]
03-532-[DIMS]-[OPTIONS]

ROCKART's handsome ***PEDESTAL SIGN DISPLAYS*** (also known as *Interpretive Signs*) are the right choice if you want your message to be accessible and presented in an engaging way. When paired with well-designed content, it will be hard for visitors to ignore.

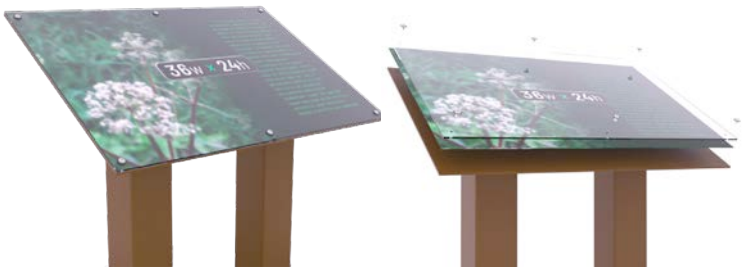
Two different mounting methods for displayed content:

• ***Framed Mount*** models (**#03-532** series) have a detachable, fully-enclosed aluminum frame that protects content on all sides*. This frame is then secured to the pedestal base using several pop rivets.

• ***Reverse Mount*** models (**#03-530** series) have a welded steel back plate with 2 or 3 through-holes along top & bottom edges. Signs printed onto a rigid substrate (aluminum, polycarbonate, High Pressure Laminate HPL or similar) can be attached to the plate using strips of **3M®** VHB (Very High Bond) double-sided tape; or bolted directly to the back plate.

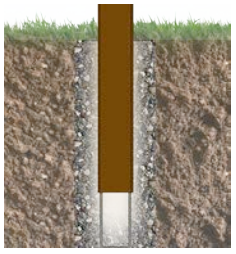
Framed Mount Models *(03-532 series)*

Reverse Mount Models *(03-530 series)*



- ✓ Professionally-Welded, 5x5 Steel-tube Pedestal Base with 1 or 2 Vertical Supports *(depends on the size of mounted sign)*
- ✓ In-Ground models should be installed at the recommended depth of 24", encased in concrete
- Rebar Anchors help to secure it in place (when installed, encased in cement)
- Available sizes: 16x10, 18x12, 22x16, 24x18, 36x24 & 48x24 *(for 03-532 series, the viewable area is less, **Custom sizes also available**)*
- Surface Mount option for above-ground installations is available
- Select a mounting method compatible with your signs:
  - **Framed Mount** *(Fully-Enclosed, Detachable Aluminum frame)*
  - **Reverse Mount**
- ✓ Powder Coat finish (Rust Texture) for lasting good looks
- ✓ Installation Guide included
- ✓ ***ROCKART®*** quality means it is ***Built to Last!***
- ✓ Signage is NOT INCLUDED, and is sold separately.

A **Surface Mount** Option available for Above-Ground installations



Rebar Anchors help secure In-Ground installations (when encased in cement)

v.20.0107

STAND-ALONE BROCHURE BOX

GROUND-INSTALLED UNIT FOR STORING PRINTED LITERATURE, MAPS, BROCHURES, ETC.

ITEM#: **03-579-[SIZE]-[OPTION]**

#03-579-60 shown here with optional ***Registration Box Add-On*** #03-710-6 (Not included, sold separately)

Our ***STAND-ALONE BROCHURE BOX*** is available in two overall sizes: 48 and 60"; with ***above-ground*** heights of 40" and 48" respectively. *The 60" model was created for compatibility with our Registration Box Add-On (#03-710-6). The 60" model is installed at a depth of 20".*

Opening the sloping, hinged lid reveals two separate compartments (front & back). Each bin stands 11.5" tall, capable of holding around 75 U.S. Letter-sized (8.5"w x 11"h) printed brochures (not included).

If you have brochures of two different sizes (such as an 8.5" tall Tri-fold layout), this unit may be ordered with the option to have split-level compartments (front is 11.5" tall, back is 9.5" tall).

All ***STAND-ALONE BROCHURE BOXES*** feature:

- 4" Rebar Anchor welded to the bottom help discourage unauthorized removal (when encased in concrete)
- ✓ Slightly-oversize, hinged lid covers both compartments and helps divert rainwater away
- ✓ Lid closes *automagically* when released
- ✓ Professionally-welded, 6x6 Steel-tube body
- ✓ "Weep holes" allow rainwater to escape
- ✓ Powder Coat finish (Rust Texture) for durability
- ✓ Well-written, fully-illustrated Installation guide included
- ✓ Compatible with other Add-On Accessories *(with 6" bracket size)*
- ✓ ***ROCKART***® quality means it is ***Built to Last*** !

(Single 8.5 x 11 page)
Actual size: 10w x 15h x 1.5d

The ***ROCKART® NOTIFIER*** series of outdoor displays are designed to protect and display a single sheet of information. Because it is fully-enclosed, it discourages vandalism attempts, resists color fading due to UV exposure, and will help keep contents relatively dry.

It is ***BUILT TO LAST™*** using high-quality materials and packs features you have come to expect from ***ROCKART®*** displays.

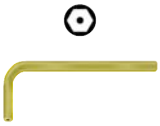
Features

- Tamper-Resistant hardware (special access tool included)
- Removable, clear .18" thick Polycarbonate cover (w/ UV inhibitors)
- Constructed from .75" thick High-Density PolyEthylene (HDPE)
- Channeled, interlocking frame allows Quick & Easy content swaps
- 2 fully-recessed mounting holes .375" dia. along vertical center
- Installation Guide included
- Discounted pricing available (based on quantity)
- Mounts easily to any vertical surface or support post.
- Maintenance-Free for 20 Years!

Display important public information like:

- *Bus route schedules*
- *Operating Hours*
- *Emergency contact info*
- *Daily menu specials*
- *Payment information*
- *Admission Fees*

... and more!



#**08-619**
Access Hex Key Tool
(included)

Actual printed sign content & mounting hardware are not included, and are sold separately.

(with Green shingles)

ROCKART® MESSAGE CENTER KIOSKS are ***BUILT TO LAST!***

- ✓ All-Steel construction
- ✓ Slotted sign panel mounting tabs allow expansion / contraction of Sign Panels as seasonal temperatures change
- ✓ 5x5 Steel-tube vertical supports
- ✓ Well-written, fully-illustrated Installation Guide included
- Tamper-Resistant fasteners to discourage thieves
- \+ Accepts up to four Full-Sized 48 x 48 Single-sided ***ROCKART®*** Sign Panels (Not Included, Sold separately)
- ✓ Professionally-welded formed steel roof panels *
- ✓ Powder coat (Rust Texture) finish
- ✓ Replacement parts always available
- \+ Available with optional Brown or Green simulated shingles *
- \+ Compatible with Add-on Accessories (5" wide bracket)

*To ensure your installation is successful, we **strongly recommend** using **Aluminum Assembly Fixtures** (#03-524). They are used as "temporary stand-ins" for the actual sign panels during installation because they are easier to handle and maintain proper spacing between posts while the concrete hardens.*

After installation is done, return the undamaged Assembly Fixtures to to ROCKART for a full refund of the security deposit (less shipping).

NOTE: Sign Panels and printed content are not included and are sold separately.

* ***Not applicable to Non-Roof models***

SIGNICADE DELUXE "A-FRAME"

PORTABLE SIGN DISPLAY - DISPLAYS TWO 24 X 36 SIGNS

Signage not included

SIGNICADE DELUXE "A-FRAME" outdoor signs are manufactured exclusively from polyethylene, a durable plastic, making them ideal for outdoor use. As a result of their durable construction, the frames won't rust or splinter over time, unlike wooden a-frames. These outdoor signs feature a sleek, white coloring. This hue allows the posters and colorful messages to pop off the board.

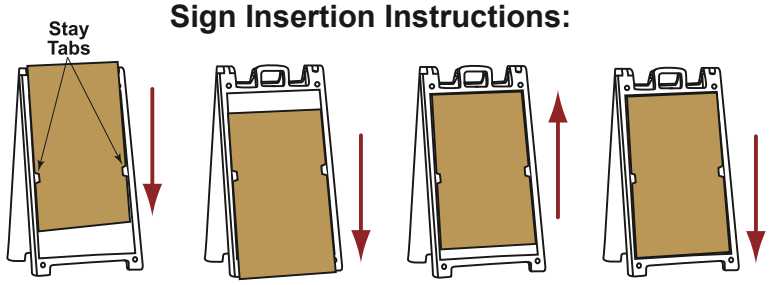
- ✓ Quick Change feature lets you swap out displayed sign content in seconds
- ✓ No maintenance necessary
- ✓ Displays two 24 x 36 Signs up to 3/16 inch thick... one on front, one on back
- ✓ No need for fasteners such as: adhesives, tape, hook & loop, tacks, push-pins, or screws!
- ✓ Once extended (opened) fully, an auto-locking hinge prevents over-extending
- ✓ "Stay Tabs" on left/right sides keep signage from bowing outward.
- ✓ Display has built-in weights, totaling 20 lbs that help keep it in place on windy days
- ✓ Up to 10 lbs of additional weight may be added by removing the plugs along the sides and pouring up to 5lbs of sand into each side.
- ✓ Built-in molded handle (top) makes it easy to carry and handle.
- ✓ Small bumps & dimples (located on front and back faces) allow stacking several closed displays vertically

Collapsed (closed) measurements: 27w x 45h x 3d
Extended (opened) measurements: 27w x 45h x 24d
Weight (empty): 20 lbs

Ordering Details

03-829 Signicade Deluxe "A-Frame" Portable Sign Stand - Displays two 24 x 36 signs up to 3/16 inch thick (signage not included)

Sign Insertion Instructions:



1. Slide sign down through the tabs
2. Slide through, pulling sign in front of bottom slot until sign hits the ground
3. Push sign up into top slot
4. Slide sign down into bottom slot

JACKJAW 300 POST EXTRACTOR

FAST, EASY, SAFE, ONE-PERSON POST REMOVAL!

ITEM#: **08-101**

U-Channel Post

Save time & fuel while preventing injuries with the ***JACKJAW 300 POST EXTRACTOR!*** **JACKJAW** is the new force in post pulling. The powerful, patented jaw and mechanism allows pulling posts straight out of the ground or asphalt without bending the post or breaking your back. You no longer need two people, a Bobcat or a heavy, cumbersome hydraulic system to remove installed posts.

Crooked post or uneven ground? ...No Problem! Just tilt the JackJaw to align with the post.

JACKJAW is produced from heavy gauge steel plate and tubing to withstand everyday job site use. The easily replaceable jaws are case hardened AR400 steel for long wear. No paint to chip. **JACKJAW** units have a zinc and clear chromate plating for long lasting durability and corrosion resistance.

- ✓ Fast, easy, safe removal of installed marker posts
- ✓ **JACKJAW 300** removes U-Channel, T-posts, Grounding rods, and Dual-Flex markers
- ✓ Lightweight (24 lbs), powerful, All-steel construction
- ✓ Grips tightly on post, no slipping, no back strain
- ✓ **16 to 1 Mechanical Advantage**
  (100 lb push down on handle = 1600 lb pull up on sign post)
- ✓ **3200 lb** gripping force against the post
- ✓ Portable, No set-up or assembly required to use!

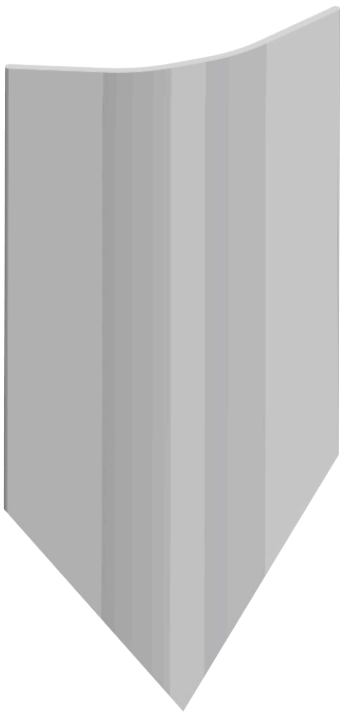
v.20.0107

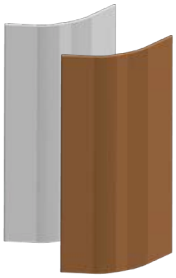
ARC-TEC

GROUND-DRIVEN FIBERGLASS MARKER POST

ITEM#: AT[SIZE]-[COLOR]



62" (5'-2") 66" (5'-6") 72" (6') 78" (6'-6") 82" (6'-10")



ARC-TEC marker posts can display decals or reflective sheeting up to 4" wide on either side. At only .21 lbs / foot, it is the lightest post if packing into remote locations. Its thin profile provides more flexibility that helps minimize potential damage to the post or vehicle when impacted from the convex side (front).

The ***ARC-TEC*** post comes with one end pre-cut into a "V-shaped" tip and can be installed using compatible drivers and soil preparation techniques.

If additional theft protection is desired or the installation site has relatively soft soil, consider using an ***ARC-TEC ANCHOR*** with this post (not included, and are sold separately **#08-114**). It can be installed on the concave side (back) of the marker post (sorry, we do not offer anchor pre-installation service for this post).

Economically priced, the ***ARC-TEC*** profile is an excellent trail marking product. In White: ☐ White (-00), ■ Brown (-01).

Weight: .21 lbs/ft

Any quantity of posts may be ordered. However, greater pricing discounts are applied when ordering multiples of 25. If you are preparing a government bid or wish to order more than 524 posts, please contact us for special pricing.

A single anchor may be installed on the BACK (concave) side

08-114 Arc-Tec Anchor (1 side)

Decals & Reflective Sheeting

This post can display decals or reflective sheeting up to 4" wide on either side.

Snow Poles

Attaching snow poles to this post is not recommended.

Installation Tools

Standard post-drivers can be used to install this post.

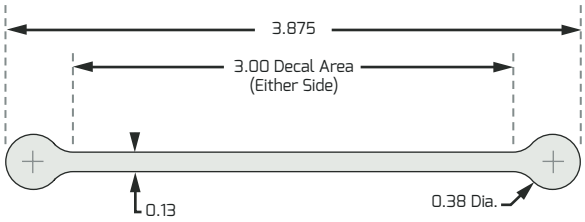
DUAL-FLEX

GROUND-DRIVEN FIBERGLASS MARKER POST

ITEM#: DF[SIZE]-[COLOR]

24" (2')
36" (3')
48" (4')
62" (5'-2")
66" (5'-6")
72" (6')
78" (6'-6")
82" (6'-10")

See note regarding 24, 36, & 48 lengths.



DUAL-FLEX is one of our most popular and versatile fiberglass marker posts. It is a cost effective solution for marking secondary routes, campsites or trails.

It can be used to display standard decals or reflective sheeting up to 3" wide on either side to increase visibility of the post or to show messages to users traveling in either direction.

With its ***medium*** flexibility rating, it can support the use of snow poles or attaching a small 4x4 or 6x6 sign (using a compatible bracket).

When unauthorized removal / theft is a concern, this post is compatible with two different anchors, which may be installed on one or both sides (see below).

Each post comes with the bottom end pre-cut into a "V-shape" to allow easier installation and is available in: White (-00), Brown (-01), Yellow (-02), Orange (-03), Red (-04), Blue (-05) and Green (-06).

Weight: .47 lb/ft

Any quantity of posts may be ordered. However, greater pricing discounts are applied when ordering multiples of 20. If you are preparing a government bid or wish to order more than 519 posts, please contact us for special pricing.

Anchors may be installed on one or both sides

08-111-1 Flex-Flange Anchor (Single-sided)
08-111-2 Flex-Flange Anchors (Double-sided)
08-112-1 Rock-Flex Anchor (Single-sided)
08-112-2 Rock-Flex Anchors (Double-sided)

Decals & Reflective Sheeting

This post accepts decals and rective sheeting up to 3" wide on either side.

Snow Poles

This post is compatible with snow poles mounted on either side. Ask about our Snow Pole Brackets.

Installation Tools

Standard post-drivers can be used to install this post.

***NOTE:** Lengths of 24", 36" and 48" are NOT kept in stock because they are not as popular, and are considered to be custom-order items. To fill an order that includes these lengths, we must cut them from a full-sized piece of material. For this reason, these sizes are Non-Returnable & Non-Refundable!*

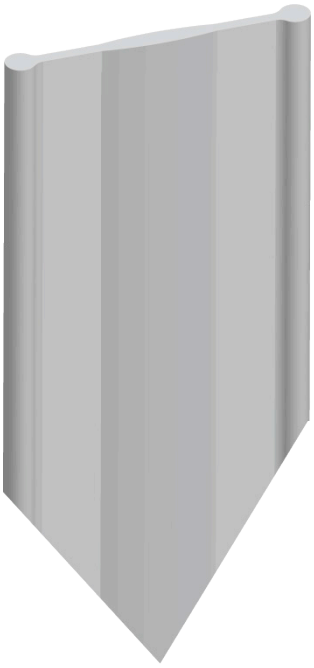
v.20.0107

FLEX-TOUGH

GROUND-DRIVEN FIBERGLASS MARKER POST

ITEM#: FT[SIZE]-[COLOR]



The ***FLEX-TOUGH*** marker post was originally designed for Utility marking. Decals up to 3" wide may be applied to one or both sides.

This symmetrical profile features a thicker center spine which helps strengthen the post throughout. It is available in 8 standard pre-cut lengths, with the bottom-end pre-cut into a "V-shaped" point for easier ground installation.

Currently, we only stock the color Brown (-01).

If ordering a ***very large quantity***, 7 additional colors may be available: White (-00), Yellow (-02), Orange (-03), Red (-04), Blue (-05), Green (-06) and Purple (-11). Call us for details.

Use of anchors is not recommend for since it lacks a flat side.

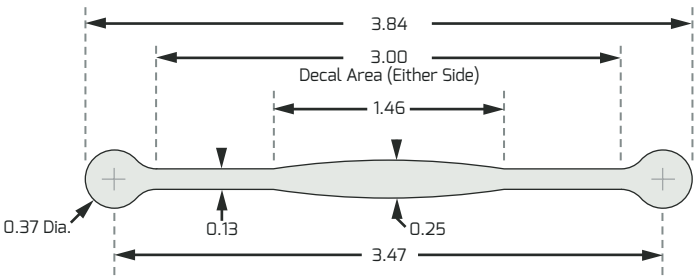
Snow Poles may be mounted to either side (using a compatible bracket) to extend visibility in deep snow.

Weight: .57 lbs/ft

Any quantity of posts may be ordered. However, greater pricing discounts are applied when ordering multiples of 20. If you are preparing a government bid or wish to order more than 519 posts, please contact us for special pricing.

24" (2')	36" (3')	48" (4')	62" (5'-2")
66" (5'-6")	72" (6')	78" (6'-6")	82" (6'-10")

See note regarding 24, 36, & 48 lengths.



Use of anchors not recommended with this post.

Decals & Reflective Sheeting

This post can display decals or reflective sheeting up to 3" wide on either side, however decals may appear slightly distorted and may need protection from (edge lift)

Snow Poles

This post is compatible with snow poles mounted on either side. Ask about our Snow Pole Brackets.

Installation Tools

Standard post-drivers can be used to install this post.

NOTE: *Lengths of 24", 36" and 48" are NOT kept in stock because they are not as popular, and are considered to be custom-order items. To fill an order that includes these lengths, we must cut them from a full-sized piece of material. For this reason, these sizes are Non-Returnable & Non-Refundable!*

We currently stock only the 01-BROWN color.
Colors other than 01-BROWN are only available in very large quantities.
This is the only fiberglass post available in 11-PURPLE.

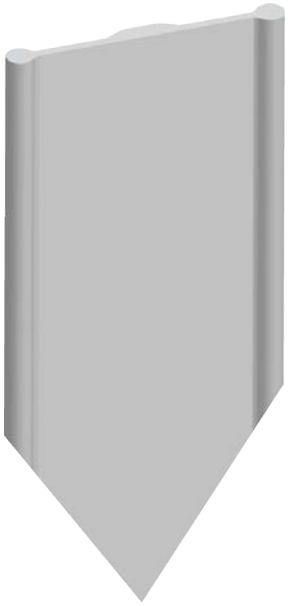
GLAS-FLEX

GROUND-DRIVEN FIBERGLASS MARKER POST

ITEM#: GFX[SIZE]-[COLOR]



GLAS-FLEX posts are more resistant to vehicular impact than our **DUAL-FLEX** or **TRI-FLEX** designs, and are the more flexible of the three. The thicker spine (running up the center of the back) was designed to strengthen the post. It will support attaching a small 4x4 or 6x6 aluminum sign without requiring spacers.

Decals or reflective sheeting up to 3" wide may be applied to the front (flat) side.

Standard post driving tools can be used for installation.

When unauthorized removal / theft is a concern, this post is compatible with anchor installation on the front side (see below).

Each post comes with the bottom end pre-cut into a "V-shape" to ease installation and is available in: White (-00), Brown (-01), Yellow (-02), Orange (-03), Red (-04), Blue (-05) and Green (-06).

Weight: .45 lb/ft

Any quantity of posts may be ordered. However, greater pricing discounts are applied when ordering multiples of 20. If you are preparing a government bid or wish to order more than 519 posts, please contact us for special pricing.

24" (2')	36" (3')	48" (4')	62" (5'-2")
66" (5'-6")	72" (6')	78" (6'-6")	82" (6'-10")

See note regarding 24, 36, & 48 lengths.

A single anchor may be installed on the front (flat) side

08-111-1 Flex-Flange Anchor (Single-sided)
08-112-1 Rock-Flex Anchor (Single-sided)

Decals & Reflective Sheeting

This post accepts decals or reflective sheeting up to 3" wide on either side, however decals applied to the backside may appear distorted and may start to fall off over time (due to edge lift)

Snow Poles

This post is compatible with snow poles mounted on either side. Ask about our Snow Pole Brackets.

Installation Tools

Standard post-drivers can be used to install this post.

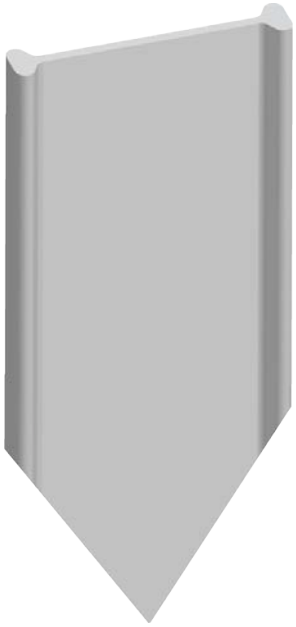
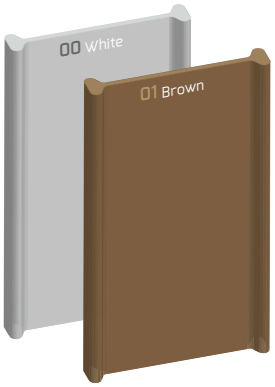
SIGN POST MARKER

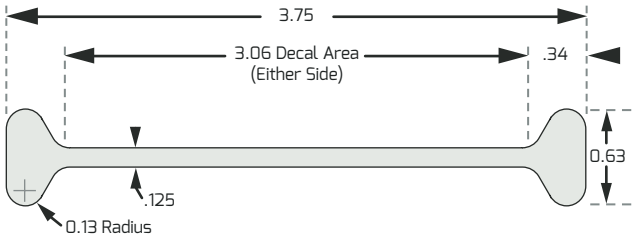
GROUND-DRIVEN FIBERGLASS MARKER POST

ITEM#: SPM[SIZE]-[COLOR]



62" (5'-2") | 66" (5'-6") | 72" (6') | 78" (6'-6") | 82" (6'-10")





The ***SIGN POST MARKER*** is our most rigid fiberglass marker post. It was designed to handle the added stress & strain resulting from the use of small signs and/or Snow Poles.

The super-rigid profile of this post should easily support the use of Snow Poles for areas that receive heavy snowfall. At 3.75" wide, it will accommodate standard 3" decals/reflectors on one or both sides. Available in 5 popular sizes and in 2 colors: ☐White (-00), ■Brown (-01).

Compatible with our ***ROCK-FLEX ANCHORS*** **(08-112)** or ***FLEX-FLANGE ANCHORS*** **(08-111)**, on one or both sides (see below).

Each post comes with one end cut into a "V" shape to ease installation.

Installs with standard post drivers (not included, and sold separately).

Weight: .58 lbs/ft

Any quantity of posts may be ordered. However, greater pricing discounts are applied when ordering multiples of 15. If you are preparing a government bid or wish to order more than 510 posts, please contact us for special pricing.

An anchor may be installed on one or both sides

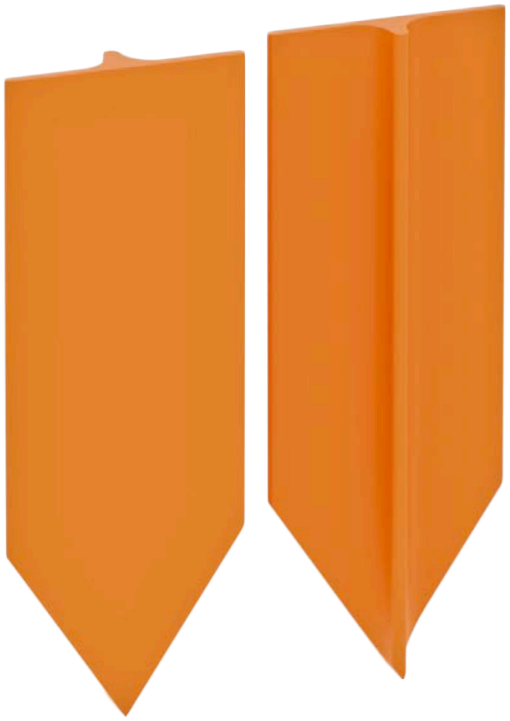
SINGLE-RIB BOUNDARY MARKER

FIBERGLASS POST FOR MARKING BOUNDARIES & SURVEYING

ITEM#: SRBM[SIZE]-[COLOR]



Our new ***SINGLE-RIB BOUNDARY/SURVEY MARKER*** is replacing our ***BOUNDARY MARKER*** product (# **BM**).

The front side is perfectly flat and will accept decals up to 2.5" wide - we carry many strip decals that are specifically designed for use with these slightly narrower posts.

Each post comes with one end pre-cut to a point making it a little easier to drive into the ground using a compatible post drivers.

Available in 5 popular sizes: 48, 62, 66, 72 and 78-inch, and in the colors: Brown (-01) and Orange (-03).

Any quantity of posts may be ordered. However, greater pricing discounts are applied when ordering multiples of 20. If you are preparing a government bid or wish to order more than 519 posts, please contact us for special pricing.

TRI-FLEX

GROUND-DRIVEN FIBERGLASS MARKER POST

ITEM#: TF[SIZE]-[COLOR]

The ***TRI-FLEX*** post has radii on the stiffening rib to minimize the chances of splitting when placed under stress. It now exhibits increased durability for high traffic areas.

Standard 3 inch wide decals may be applied to one side and are protected by the edge rib design. Stiffer than our ***DUAL-FLEX*** and ***GLAS-FLEX*** marker posts, the ***TRI-FLEX*** can be driven into most soil types with standard post drivers.

Available in: White (-00), Brown (-01), Yellow (-02), Orange (-03), Red (-04), Blue (-05) and Green (-06).

It can be used with optional snow pole brackets with any style snow pole, as well as our Rock-Flex (**08-112**) or Flex-Flange (**08-111**) Anchors.

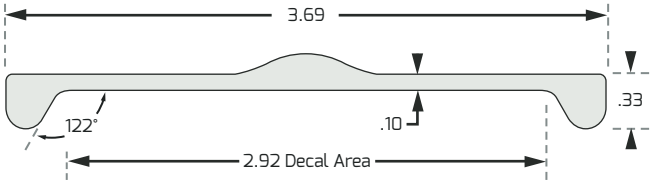
Each post has the bottom end cut in a "V-shape" to ease installation.

Weight: .43 lb/ft

Any quantity of posts may be ordered. However, greater pricing discounts are applied when ordering multiples of 20. If you are preparing a government bid or wish to order more than 519 posts, please contact us for special pricing.

24" (2')
36" (3')
48" (4')
62" (5'-2")
66" (5'-6")
72" (6')
78" (6'-6")
82" (6'-10")

See note regarding 24, 36, & 48 lengths.



An anchor may be installed on the front (flat) side

08-111-1 Flex-Flange Anchor (1 side)
08-112-1 Rock-Flex Anchor (1 side)

Decals & Reflective Sheeting

This post can display decals or reflective sheeting up to 3" wide on either side, however decals applied to the backside may appear distorted and may start to fall off over time (edge lift)

Snow Poles

This post is compatible with snow poles mounted on either side. Ask about our Snow Pole Brackets.

Installation Tools

SNOW POLE SP18

3/16" FIBERGLASS SNOW POLE

ITEM#: SP18[SIZE]-03

The **SP18** or 3/16" snow pole design offers more flexibility and is relatively lightweight at only .18 lb/ft.

The front & back sides provide additional area to enhance the visibility of the pole using strips of reflective sheeting. Economically priced as an affordable solution to make travelways more visible when weather conditions are poor.

The **SP18** may be mounted "piggy-back" onto compatible marker posts using a compatible Snow Pole Bracket.

Available in 5 popular sizes: 48, 60, 72, 84 or 96-inches and only in Orange (-03).

Consider using a ***SNOW POLE RECEIVER*** (not included, and sold separately) if installing this product seasonally. This allows quick & easy installation & removal of snow poles each season! (see below).

Any quantity of posts may be ordered. However, greater pricing discounts are applied when ordering multiples of 40. If you are preparing a government bid or wish to order more than 519 posts, please contact us for special pricing. Sold and priced as individual posts. Packaged & shipped in containers of 40 poles.

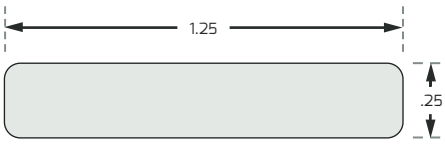
SNOW POLE SP25

1/4" FIBERGLASS SNOW POLE

ITEM#: **SP25**[SIZE]

48" (4') 60" (5') 72" (6') 84" (7') 96" (8')



Measuring 1.25" wide x .25" thick the **SP25** Snow Pole is a bit more flexibile than our **SP38** product, but more rigid than our **SP18** product. Available in 5 popular sizes: 48, 60, 72, 84 or 96-inches and only in Orange.

Anchors may be used with this snow pole (to discourage theft), see item# **03-382-2**

If you are attaching this snow pole to an existing fiberglass post, see our selection of ***SNOW POLE BRACKETS***.

Consider using a ***SNOW POLE RECEIVER*** (not included, and sold separately) if installing this product seasonally. This allows quick & easy installation & removal of snow poles each season! (see below).

Any quantity of posts may be ordered. However, greater pricing discounts are applied when ordering multiples of 30. If you are preparing a government bid or wish to order more than 389 posts, please contact us for special pricing. Packaged and shipped in containers of 30 poles.

Recommended Products

03-590,1 In-Ground Snow Pole Receiver
03-592,3 Surface-Mount Snow Pole Receiver

An anchor may be installed on either side

03-382-2 Snow Pole Anchor for SP25 & SP38 (hardware incl.)

Decals & Reflective Sheeting

Visibility of this post may be enhanced with the application of EG or HIP reflective sheeting up to 1" wide on one or both sides

SNOW POLE SP31

QUASI-ELLIPTICAL SNOW POLE

ITEM#: SP31[SIZE]-03

The ***quasi-elliptical*** profile of our **SP31** snow pole makes it a more rigid alternative to the **SP18** family of snow poles... and is priced the same!

The curved face (front) of the **SP31** will accept of EG or HIP reflective sheeting or decals up to .75" wide.

Available in 5 popular sizes of 48, 60, 72, 84 or 96 inches; and only in Orange (03).

Consider using a ***SNOW POLE RECEIVER*** (not included, and sold separately) if installing this product seasonally. This allows quick & easy installation & removal of snow poles each season (see below)!

Any quantity of posts may be ordered. However, greater pricing discounts are applied when ordering multiples of 40. If you are preparing a government bid or wish to order more than 519 posts, please contact us for special pricing. Packaged and shipped in containers of 40 poles.

48" (4') **60"** (5') **72"** (6') **84"** (7') **96"** (8')

Recommended Products

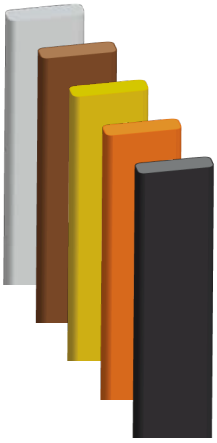
v.20.0107

SNOW POLE SP38

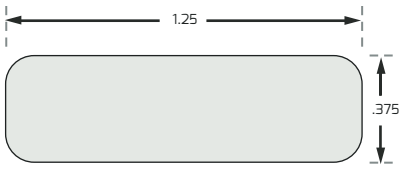
3/8" FIBERGLASS SNOW POLE

ITEM#: **SP38**[SIZE]-[COLOR]



48" (4') **72"** (6') **96"** (8')

120" (10') **144"** (12')



Our 3/8" or **SP38** Snow Pole is our most rigid snow pole product. For this reason, it is the obvious choice when a taller snow pole is needed. It is also ideal for marking roadways carrying higher-speed traffic. They are economically priced to allow adequate marking in needed areas.

These snow poles may be mounted "piggy-back" on compatible fiberglass marker posts using a compatible ***SNOW POLE BRACKET***. They can be driven directly into the ground using a compatible driver.

Front & back sides allow reflective sheeting up to 1" wide to be applied for increased visibility.

Available in 5 popular sizes: 48, 72, 96, 120 and 144 inches and in these colors : White (-00), Brown (-01), Yellow (-02), Orange (-03) and Black (-09).

Consider using a ***SNOW POLE RECEIVER*** (not included, and sold separately) if installing this product seasonally. This allows fast & easy installation & removal of snow poles each season (see below)!

Any quantity of posts may be ordered. However, greater pricing discounts are applied when ordering multiples of 20. If you are preparing a government bid or wish to order more than 389 posts, please contact us for special pricing.

TREE HUGGERS

DISPLAY DECALS ON TREES OR CURVED SURFACES

ITEM#: **01-160-**[SIZE]**-**[COLOR]

Above: 17-inch, Brown Tree Hugger #**01-160-17-01** with 4 different 3x3 decals (sold separately)

A ***TREE HUGGER*** may be the perfect solution if you wish to display one or more decals (up to 4" wide) on a tree, round post or other curved surface. Use of existing trees for mounting decals saves money possibly spent on posts and may also serve as a natural deterrent in areas where firearm vandalism to signs is prevalent. They are made from the same highly durable Fiberglass Reinforced Polyester (FRP) used in manufacturing our marker post products.

Each ***TREE HUGGER*** has 2 pre-drilled mounting holes (one at top and bottom, centered) and includes hardware for mounting to a tree: two #8 x 2.5" long phillips head deck screws, zinc plated.

There are 44 sizes available (ranging from 6" to 49", in 1" increments) so they can easily accommodate most reflective sheeting, strip decals or groupings of individual decals. They are available in 2 colors: ☐ White (-00), and ■ Brown (-01).

ORDERING INFORMATION

To leave ample room for the pre-drilled holes and mounting hardware at the top and bottom, we recommend ordering 3" OVER the total height of the decal(s) to be displayed.

Pricing discounts are quantity-based, and start at 100 units.

When installing this product on a tree, be sure to leave the screws slightly loose, to allow for tree growth.

Decals are not included and sold separately.

v.20.0107

WOOD POST MARKERS

DISPLAY DECALS ON WOODEN POSTS

ITEM#: **01-170-**[SIZE]**-**[COLOR]

Above: A 12-inch, Brown Wood Post Marker **01-170-12-01** and strip decal #**10-317** (not included)

WOOD POST MARKERS are for displaying decals (up to 3" wide) on 4 x 4" (or larger) wooden posts. They are manufactured from Fiberglass Reinforced Polyester (FRP) — the same material used to manufacture our marker posts.

Available in 44 sizes (from 6 to 49", in 1" increments) so they can easily accommodate most strip decals or groupings of individual decals. Available in 7 colors: White (-00), Brown (-01), Yellow (-02), Orange (-03), Red (-04), Blue (-05) and Green (-06).

Each has 2 pre-drilled mounting holes (one at top and bottom, centered) and includes tamper-resistant hardware for mounting to a wooden post: two #10 x 1" Long Washer Head, Square Drive Screws.

ORDERING INFORMATION

To leave enough room for the pre-drilled holes and mounting hardware at the top and bottom, we recommend ordering 3" OVER the combined total height of the decal(s) to be displayed.

Pricing discounts are available for quantities over 100.

Decals are not included and are sold separately. Wood post is not included.

U-CHANNEL POST MARKERS

DISPLAY DECALS ON U-CHANNEL POSTS

ITEM#: **01-180-**[SIZE]**-**[COLOR]

Above: 19-inch, Orange U-Channel Post Marker **#01-180-19-03** pictured with strip decal #**10-953** (sold separately) on a 2-lb U-Channel Post (sold separately)

Our ***U-CHANNEL POST MARKER*** allows displaying decals (up to 3" wide) vertically-aligned on steel 1 or 2-lb/foot, U-Channel posts. Available in 44 sizes (6 to 49"; in 1" increments) so they will easily accommodate most strip decals or a group of individual decals.

Available in 7 colors: White (-00), Brown (-01), Yellow (-02), Orange (-03), Red (-04), Blue (-05) and Green (-06). They are made from the same highly durable Fiberglass Reinforced Polyester (FRP) used in manufacturing our marker post products.

Each marker has 2 pre-drilled holes (one at top & bottom end, on 1" centers). Mounting hardware is not included and we recommend one of our tamper-resistant fasteners that will discourage theft (see below).

ORDERING INFORMATION

To leave ample room for the pre-drilled holes and any mounting hardware used, we recommend adding 3" to the total height of the decal(s) to be displayed.

Pricing discounts are available, and start at 100 units.

U-Channel Post, Mounting hardware & Decals are not included and sold separately.

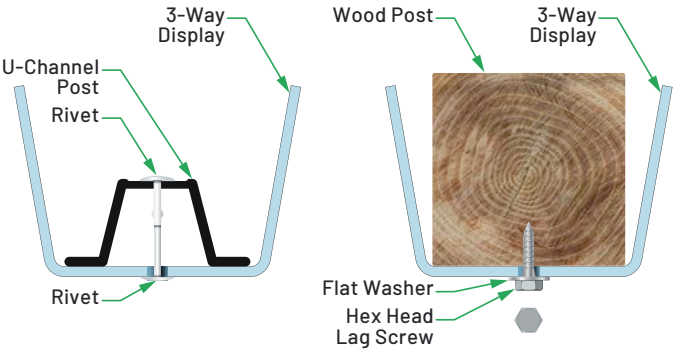
MULTI-FACET DECAL DISPLAYS

DISPLAY DECALS ON MANY SIDES (FOR U-CHANNEL AND WOOD POSTS)



Above: An 18" tall, 3-Way Multi-Facet Display for 3" wide Decals **#01-374-18** (shown with various 3 x 3 decals, sold separately). One on left is mounted to a U-Channel Post (sold separately). Right one is mounted to a 4 x 4 Wood Post.

Our ***MULTI-FACET DECAL DISPLAYS*** are made from 3/16" thick clear polycarbonate and allow a decal-friendly surface to display decals on 1, 2 or 3 sides. Allows customized messaging for users approaching from different directions. Two decal-widths are available: 3" or 4" wide decals. Designed for use with U-Channel or 4 x 4 Wood Posts. Available sizes range from 6-48"; in 1" increments, so they will accommodate most strip decals or group of individual decals.

Each unit has 2 pre-drilled holes (.375" dia.; one at top & bottom end, on 1" centers). Mounting hardware is not included and is sold separately (see below).

ORDERING INFO

To leave enough room for the pre-drilled holes and mounting hardware at the top and bottom, we recommend adding 3" to the total height of the decal(s) to be displayed.

Choose number of sides (1-Way, 2-Way or 3-Way), the width of decals being displayed (3" wide or 4" wide), and the length of the Sign Blank (6" to 48"; 1" increments)

U-Channel Post, 4 x 4 Wood Post, Mounting hardware & Decals are not included and sold separately.

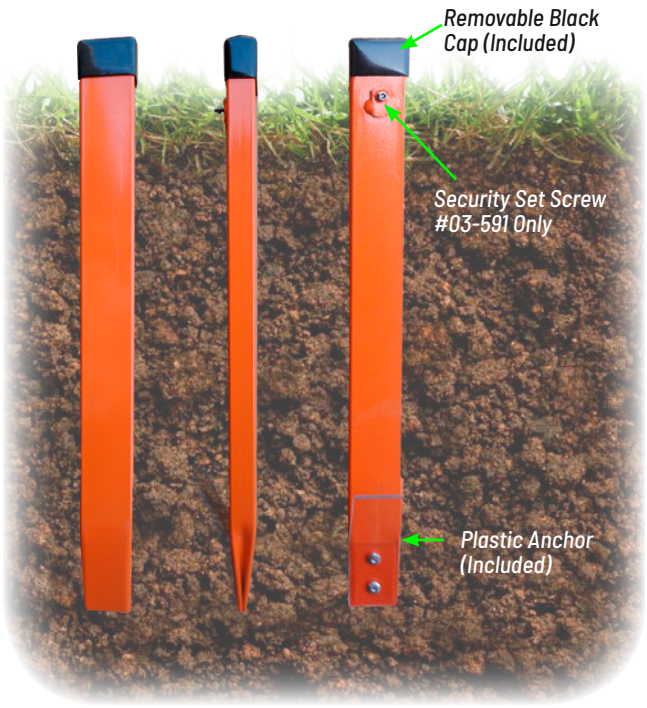
SNOW POLE RECEIVER

*for **Ground-Driven** Installations*

ITEM#: **03-590** / **03-591**



ROCKART's Ground-Driven Snow Pole Receivers offer many features to save time and money!

Crafted from heavy-gauge rectangular steel tubing 16" tall x 1.5"wide x .75" deep, with the bottom pinched together to form a wedge. A small gap remains, so rainwater can drain out.

Each ***Ground-Driven Snow Pole Receiver*** includes a high-impact polycarbonate anchor that will discourage theft / unauthorized removal. This means it may remain installed year round in some locations.

For added protection against unauthorized removal of the installed Snow Pole, model **#03-591** features a Tamper-Resistant Security Set Screw. Located on the back, this screw provides an added deterrent to would-be thieves.

We recommend leaving the top 2 inches of the receiver exposed above ground, so that it may be located more easily.

During the off-season, place the included black Vinyl cap over the opening (after snow pole removal) to help keep debris and moisture out.

A "safety orange" powder coat finish adds durability, longevity and makes the exposed part of the receiver easy to locate.

For easier installation in areas with dense top soils, consider using one of our Snow Pole Receiver Drivers (see below).

ORDERING INFORMATION

03-590	Snow Pole Receiver (No Set Screw)
03-591	Snow Pole Receiver (with Security Set Screw)

Snow Pole Compatibility

Compatible with ROCKART® **SP18**, **SP25**, **SP31** and **SP38** Snow Poles and other manufacturers.

SNOW POLE RECEIVER

*for **Post-Mounted** Installations*

ITEM#: **03-592** / **03-593**

Above: *Post-Mounted Snow Pole Receiver* with a 1 x 10" HIP Reflective Strip applied.
Mounted to a U-Channel Post (not included)

ROCKART's Post-Mounted Snow Pole Receivers offer many features to save time and money!

Crafted from heavy-gauge rectangular steel tubing 16" tall x 1.5"wide x .75" deep, with the bottom pinched together to form a wedge. A small gap remains, so rainwater may escape.

Mounting tabs are spaced at 1" centers, making the ***Post-Mounted Snow Pole Receiver*** perfect for mounting to vertical surfaces, such as U-Channel posts or Guard Rails found along roads and highways.

For added protection against unauthorized removal of the installed Snow Pole, model **#03-593** features a Tamper-Resistant Security Set Screw. Located on the back, this screw provides an added deterrent to would-be thieves.

A "safety orange" powder coat finish adds durability, longevity and visibility.

For added visibility, consider applying a 1" wide strip of HIP (High-Intensity Prismatic) reflective sheeting (not included, sold separately) to one or both sides of the receiver body.

Because this product may be used with many types of posts, hardware is not included. Suggested hardware is listed below.

ORDERING INFORMATION

03-592	Snow Pole Receiver (No Set Screw)
03-593	Snow Pole Receiver (with Security Set Screw)

Recommended Mounting Hardware

Wood Post Installation

08-1049	5/16 x 1" Hex Head Lag Screw

FOLIA MARKERS

ANGLED DECAL DISPLAY EXTENSIONS

ITEM#: **08-230 - 08-233**

FOLIA MARKERS are an affordable, easy way to communicate additional information at specific points of interest along a trail or other popular attraction. Display additional information such as...

- ✓ Details about plants or animals that live in the area (specie / family name, etc.)
- ✓ Awareness to possible dangers that may be present (i.e., poisonous plants, predatory animals, etc.)
- ✓ Messages that remind visitors about permitted / prohibited activities.

These clear polycarbonate enhancements are 3/16" thick and angled at 20° making the experience more viewer-friendly. They feature smooth (rounded) corners and are available in 4 sizes: 3-, 6-, 9- and 12-inch tall (depending on the total height of your decal content).

They mount easily onto any flat side of a ground-driven Marker post using the included Pop Rivets. (Note: 2 holes are required near the top of the marker post for proper installation)

ORDERING INFORMATION

Item #	*Description*
08-230	3x3 display area
08-231	3x6 display area

THE QUICK & EASY WAY TO TIGHTEN WIRE FENCES

ITEM#: **08-652**
03-370, 03-371

Repairing loose fence wires doesn't have to be time-consuming nor expensive!

The ***Fence Wire Tightener*** allows you to "take up the slack" in drooping wire fences — *without cutting or splicing!*

In about a minute, you can tighten a strand of loose fence wire with this amazing product. Use the ***Wire Tightener Tool*** to install a ***Tightener Clip*** on most types of wire fence. It will change the way you repair your Wire Fences! Compatible with wire fence strands up to 12.5 gauge.

- ✓ Effective, Inexpensive solution to fix loose wire fences
- ✓ Simple to Use
- ✓ No cutting / splicing necessary
- ✓ Doesn't crimp wires
- ✓ Clip may be removed and reused again
- ✓ May be re-adjusted at any time
- ✓ Compatible with wire strands up to 12.5 gauge

WESTERN GATE CLOSER

ITEM#: **03-818-18**

A LEVERAGE-POWERED ASSISTIVE DEVICE FOR CLOSING WESTERN-STYLE GATES

The ***Western Gate Closer*** is a leverage device that makes closing wire gates easier (also known as "Western" or "Texas" Gate).

A person passing through a gate equipped with this device can use the added leverage it provides to bring the two posts together so that the top retaining loop may be secured properly.

The 36" long chain serves as an "adjustable loop" and installs easily in minutes. This product includes Tamper-Resistant hardware for "anchoring it" to the stationary side of the gate and 2 "S-hooks" to cradle the lever when not in use.

The idea behind this product is to enable users to close these gates more easily. Hopefully, it will lower the chance of a stubborn gate being left open by a user who was unable to close it properly.

T-POST SIGN MOUNTS

SOLUTION FOR MOUNTING SIGNS ON T-POSTS

ITEM#: **03-323**

Make your ***T-Posts*** more useful with these ***Sign Mounts.***

This cleverly-designed sign mount installs easily in seconds by simply clipping it onto an existing T-Post.

Install anywhere along the post, "in-between" the evenly spaced bumps running down the center of the T-Post. Sign height is limited only by the post height. The mounts may be removed or re-positioned later, if needed. Once the sign mount is secure, attach the sign to the mounts using the included self-drilling screws.

- ✓ Quickly and easily attach signs to T-posts
- ✓ May be removed easily
- ✓ Accommodates most sign heights

DECALS TO REDUCE VANDALISM

REDUCE VANDALISM IN PUBLIC AREAS

#30-144

#30-145

#60-235

#60-236

These 3 x 3 decals are screen-printed on 3M Engineering Grade Sheeting using UV-Resistant inks.

Also Available In These Sizes

Item #	Description
60-1069	2 x 1.5 USA flag decal
60-920	6 x 4 USA flag decal
60-921	12 x 8 USA flag decal
60-922	15 x 10 USA flag decal
60-923	18 x 12 USA flag decal

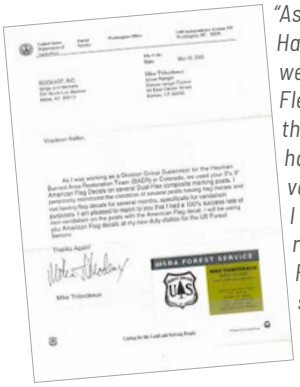
Vandalism to public lands continues to be a huge problem that cost tax payers several millions every year. Types of vandalism/ abuse frequently committed range from simple graffiti up to the complete destruction of kiosks, marker posts and signs (usually by shooting at them repeatedly with a firearm... for target practice).

Several federal agencies have conducted research into this on-going problem have discovered that some acts of vandalism may be averted through the use of strategically-placed decals showing a US Flag and patriotic verbiage.

Once applied prominently to kiosks and public signs, these decals may help reduce the number of vandalism incidents. Subconsciously, the perpetrator may begin drawing conclusions that they are targeting the country they love.

This subtle (but powerful) proactive step is one cost-effective way to help address this widespread problem, and it reminds visitors that maintaining our ***shared*** land is everyone's duty! It's a small investment ...when compared to the cost of ***replacing*** damaged signs!

With Flag Decals



TESTIMONIAL

"As I was working as a Division Group Supervisor for the Hayman Burned Area Restoration Team (BAER) in Colorado, we used your 3 x 3 American Flag Decals on several Dual-Flex composite marker posts. I personally monitored the condition of several posts having flag decals and not having flag decals for several months, specifically for vandalism purposes.
I am pleased to report to you that I had a 100% success rate of non-vandalism on the posts with the American Flag decal. I will be using these decals at my new duty station for the US Forest Service.
Thanks Again!"

Mike Thibodeaux, Snow Ranger, USFS Kamas, UT

4x4 RECREATION DECALS

STAND OUT FROM THE PACK WITH OUR BIG & BOLD 4 X 4 DECALS!

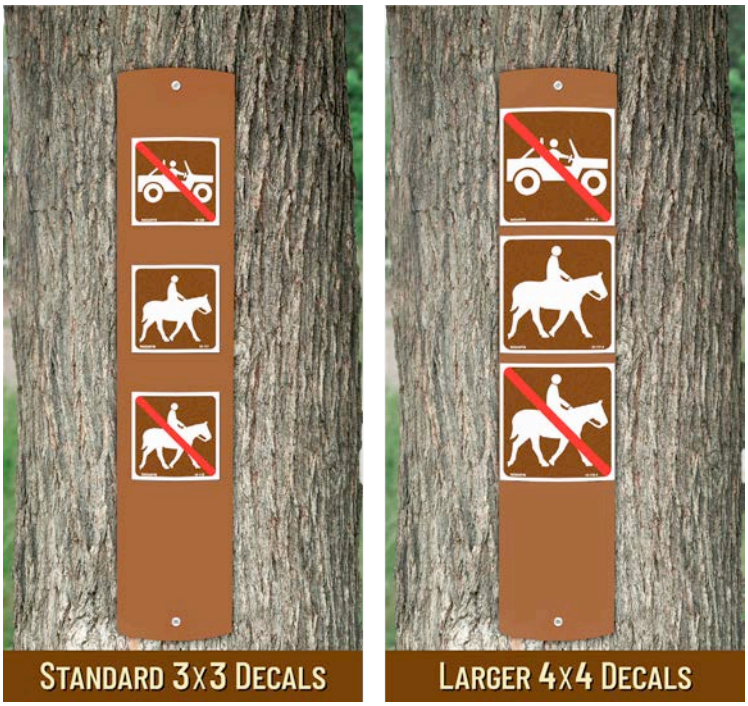

Photo showing visible difference between **3x3** and **4x4** decals applied to a Tree Hugger

Get noticed with these highly-visible recreation decals!

ROCKART has a growing selection of recreation symbols available in 4" x 4" size. This group of decals are printed on ***Engineering Grade*** (EG) reflective material, and with sixteen (16) square inches of material exposed, they are ***43% MORE VISIBLE*** than standard 3 x 3 decals!

For trails with users travelling at high speeds, use of larger format symbols may be considered a safety requirement in some areas. It has been shown that larger symbols are more likely to be seen by fast-moving users.

Interested in using 4x4 decals, but are unsure how they can be adapted for use within existing structures?

Please ask us about these ***ROCKART*** products that are 100% compatible with these big & bold 4x4 decals:

01-160	Tree Huggers
AT	Arc-Tec Ground-Driven Marker Posts
01-375	1-Way Multi-Facet Decal Display (for 4" Decals)
01-376	2-Way Multi-Facet Decal Display (for 4" Decals)
01-377	3-Way Multi-Facet Decal Display (for 4" Decals)

ORDERING INFO

Most of our larger 4x4 decals have the same part number as their 3x3 counterparts, with the addition of '**-4**' at the end. ***Example:*** the Item # for the 4x4 version of the 3x3 decal: ***10-121 Hikers/Hiking*** would be: **10-121-4**.

NEED A CUSTOM SIGN OR DECAL?
ROCKART Can Help!

ROCKART® Signs and Markers can help you *create* and *deliver* ANY message in a professional manner.

In addition to our giant selection of popular signs & decals, we can also produce custom signs in any quantity. Our knowledgable staff is friendly and will gladly answer any questions you may have about materials, manufacturing options, associated costs. You'll get high-quality signs you need ... at a price that fits your budget!

Next time you need to design a Sign or Decal, ***ROCKART*** is here to help! (design charges may apply)

On-Demand In-House Printing

This production method is best-suited for rush-orders or lower-quantity runs. We can manufacture signs using this method for these substrates: Aluminum, Magnetic Material, Corrugated Plastic, Sintra.

Screen Printed Signs

A cost-effective choice when ordering larger quantities (25+) of signs with only 1~4 colors and turn-around time is not critical.

These signs may be produced on a variety of substrates: Aluminum, PolyFlex, Magnetic Material and Corrugated Plastic.

Routed Plastic (HDPE) Signs

For long-lasting, aesthetically-pleasing signs that are used in high-visibility areas and requiring NO maintenance, **H**igh-**D**ensity **P**oly**E**thylene routed plastic may be the best choice.

Made from extremely durable, recycled PolyEthylene these signs feature text and simple graphics are literally "carved into" the top layer of the plastic, exposing the contrasting layer below. (Learn more about Routed Plastic Signs on our website!)

3D view of bicolor HDPE before routing.

Digitally-Printed Signs

Similar to the full-color printing process used by magazines, this method is ideal for complex graphics such as maps when multiple halftone screens are being used, and when your a calls for three or more colors of ink to be used.

A large selection of substrates is available: Aluminum, Magnetic Material and Corrugated Plastic, and all have a UV over-laminate to protect against color-fade.

Embedded Image Signs

These digitally-printed signs have ink applied into the top substrate using a pressurized lamination process, wherein the ink is actually embedded within the substrate.

This process is ideal when you have complex multi-color graphics and/or photographs you want incorporated in your signs.

QR CODE Integration

Extend your communication to the internet through the use of "Quick Response" or QR CODES.

This technology (similar to a bar code) enables mobile device users to access additional/up-to-date information via a website link. Call Us to learn more about using this exciting technology!

BONUS SECTION

BEST PRACTICES

Guides to What Works

How to - Properly - *Apply Decals*

Before doing anything else, check your strip decal and see approximately where you would like it placed on your fiberglass post.

Clean the area of the fiberglass post where the decal is to be applied to make sure there is no dust or debris on the surface. For best results, we recommend using acetone or alcohol.

Peel back about ½" of the decal backing from the TOP of the decal, and trim the backing with scissors, so that about ½" of the decal's adhesive is exposed.

Be careful not to touch anything to the exposed adhesive area of the strip decal.

Without touching the decal adhesive to the fiberglass post, position the decal on the fiberglass post, making sure it's centered and at the correct height.

When you are happy with the placement of the decal, firmly press the ½" of exposed adhesive at the top of the decal to the fiberglass post to adhere it to the post.

Carefully lift the bottom of the decal, so that you will be able to grab the decal backing. Don't tug on the small section of decal that is now attached to the post.

Grab a corner of the decal backing, and peel it back ever so slightly.

The fingers of one of your hands will stay on top of the decal, smoothing it down, while you slowly pull the decal backing off with your other hand.

To ensure applying the decal straight, use the decal backing as a guide and pull it straight down the post. It's important to keep your eyes on the hand pulling the backing down the post.

The hand that is smoothing the decal should be right at the juncture of where the decal backing is leaving the decal.

Be careful not to stretch the decal, as that could cause it to go on crooked.

Almost done...

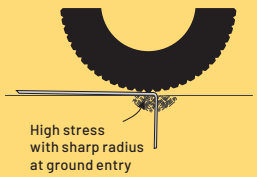
When the decal is in place, use a clean cloth to smooth all of the edges of the strip decal, and make sure the decal is securely attached to the fiberglass post.

Tips for *Surviving Vehicular Abuse*

Installing Marker Posts to Survive Vehicular Abuse

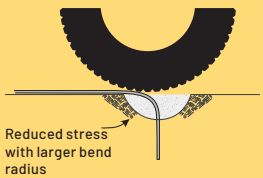
The Problem

Typical marker post installation may increase stress at ground level when impacted



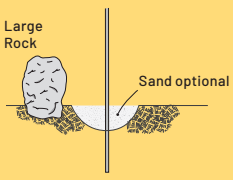
Solution #1

New installation methods, using sand and/or gravel lowers the stress by increasing the post's bend radius



Solution #2

Placing a large rock in front or behind the Marker Post creates a natural barrier to deter on-coming traffic from abuse and vandalism.



All Diagrams Are Displayed In Side View

Solution #3

Building a burm on both sides (front & back) of a Marker Post raises the stress point above ground level to reduce the likelihood of fracturing or permanent damage.

PROTECTING DECALS *with* EDGE TAPE

Extend the usable life of Decals by applying a strip of protective Edge Tape. It helps protect against the deteriorating effects resulting from repeated exposure to exteme temperatures, strong winds, rain and snow.

ITEMS NEEDED

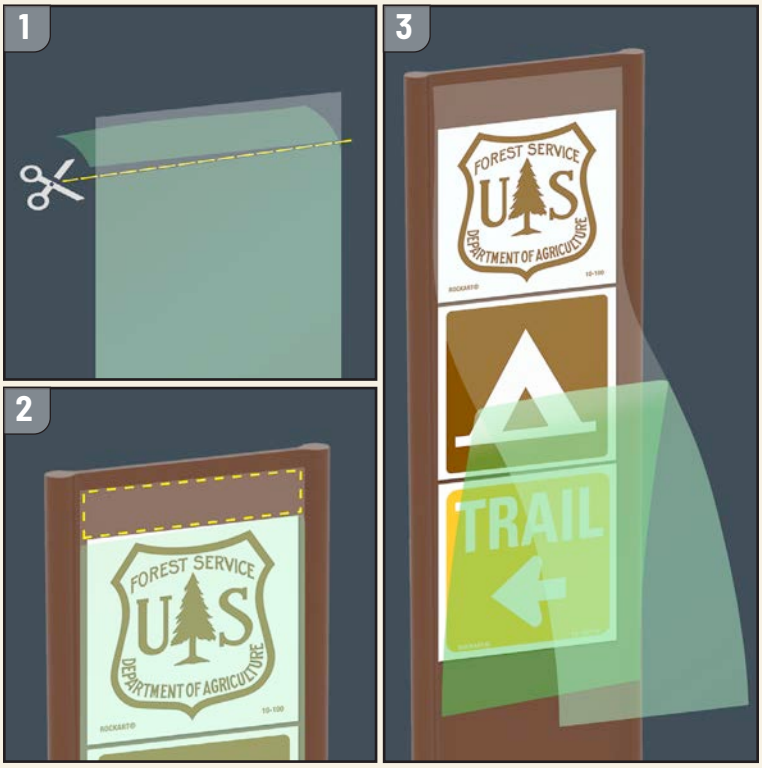
- 3" wide Transparent Protective Edge Tape **#07-180** or 4" wide Transparent Protective Edge Tape **#07-178** (depending on decal width / type of marker post used)
- Scissors
- Measuring Tape (if the strip lengths are unknown)
- Lint-Free Cleaning Cloth and isopropyl alcohol
- Squeegee, hand roller or semi-rigid plastic card the size of a credit card (an expired membership card works well) for removing air bubbles

TIPS

- If possible, pre-cut all strips of Edge Tape to be applied.
- Strips should be 1-2 inches taller than the decal area.
- If the topmost decal is .5" or less from the top of the marker post, you may want to add another inch, so that the edge tape can be wrapped over the top edge of the post.
- See our related tutorial, ***How to Apply Decals***.
- ***A clean surface is crucial!*** Contaminates like dust & dirt can increase the chance of premature adhesive failure.

STEPS

1. If the front of the post is not already clean, be sure to clean it using a lint-free cloth (and alcohol if needed).
2. From the roll of Edge Tape, cut a strip that is long enough to completely cover all decals (see Tips for strip length recommendations).
3. At the top end of the strip, peel back about .75" of the liner from the edge tape and cut it off (so you have about .75" of exposed adhesive, see Fig 1).
4. Position the strip on the post vertically while keeping the exposed adhesive from touching the post, just yet. Once the strip is aligned, firmly press the exposed adhesive against the post (area highlighted in yellow, Fig 2).



5. Lift up the bottom of the strip, flipping it over and grab a bottom corner of the liner (at the point where you previously cut off a .75" section).
6. Working downward, continue to simultaneously remove the liner by pulling it downward (with one hand), while also using your other hand to press the exposed adhesive against the post (see Fig 3).
7. Ensure the Edge Tape is applied to the surface completely. Use a hand roller, squeegee, or plastic card to remove bubbles by "pushing" them to the nearest edge.

← Decals applied ***without*** Protective Edge Tape may begin deteriorating once exposed to harsh conditions year after year.

HOW TO DISPLAY
CAMPSITE AVAILABILITY
with a
CLEAR PROTECTIVE VINYL POUCH

Use a ROCKART Clear Protective Vinyl Pouch to display availability status of each Campsite.

Our PolyFlex® inserts are environment-friendly (re-usable) and work great with 'Dry-Erase' pens (#08-608).

Use a **ROCKART** Clear, Protective Vinyl Pouch **(#03-386)** to display availability status of each campsite.
Installing the pouch "flipped over" (i.e., with the short flap against the front of the marker post) will also help keep moisture out.
Our PolyFlex inserts may be used with Dry-Erase markers.

COMPATIBLE INSERTS

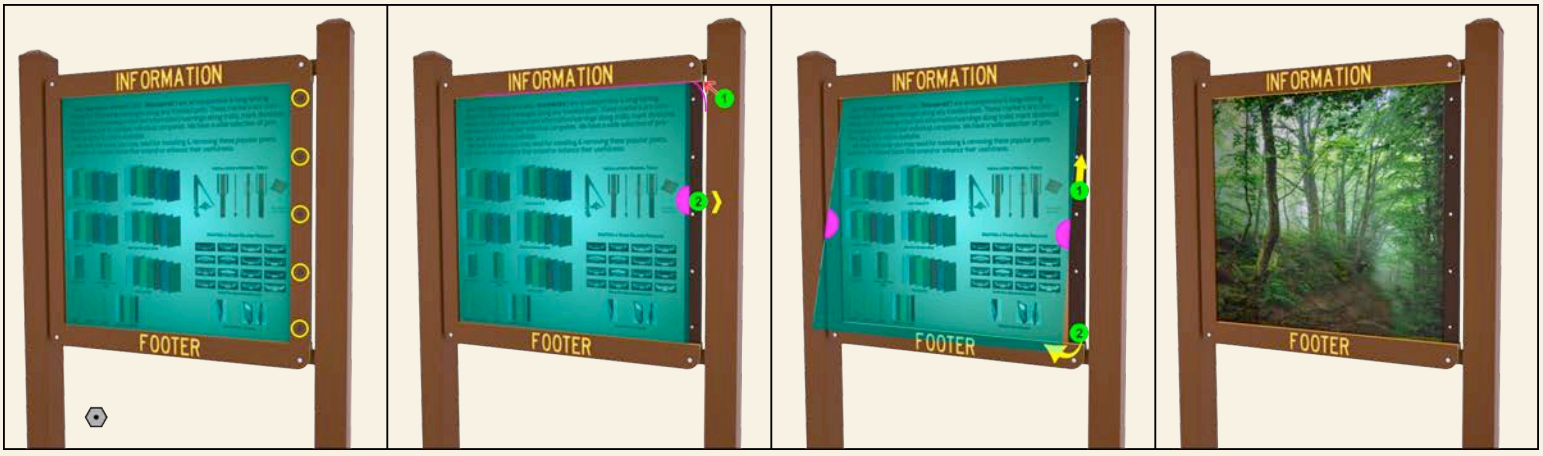
HOW TO
SWAP OUT A GRAPHIC INSERT
for a **ROCKART®**
MESSAGE CENTER KIOSK SIGN PANEL



1. Using the special access hex key that came with your sign panel, remove the bolts along the right (circled in Yellow above) side that secure the right rail. Keep the bolts and removed side rail in a safe place for later.
2. Grasp the end of the flexible security rod (see ❶ above) and pull it out of the channel located just above the polycarbonate.
3. Grab the right center edge of the clear cover (❷), and pull it to the right about 3 inches.
4. Grasp both sides of the clear cover and lift it straight up, until it stops (see ❶ above).
5. Turn your wrists to pivot the bottom edge towards your body, until the cover can be removed completely (see ❷ above).
6. Replace the graphic insert and perform the previous steps in reverse to secure the sign panel. (Don't forget to re-insert the flexible security rod!)

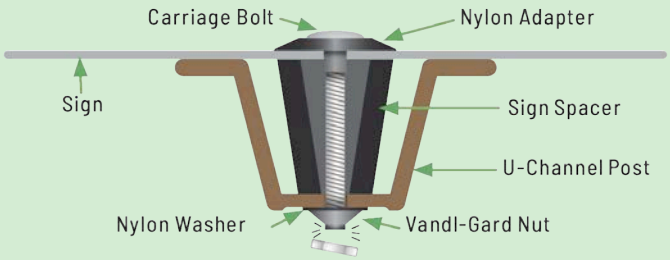
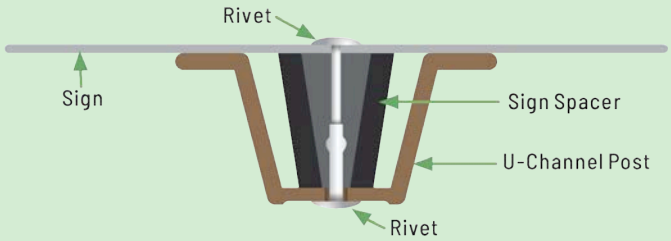
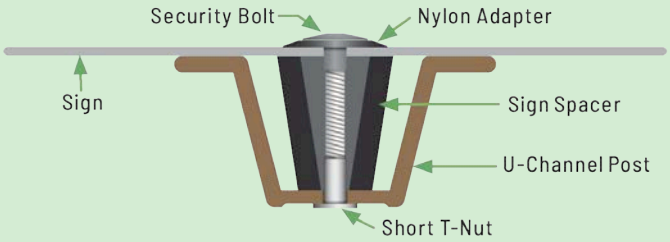
SIGN MOUNTING OPTIONS FOR U-CHANNEL







INSTALLING MARKER POSTS

FOR BEST RESULTS

1. Install a Marker Post by first inserting the non-pointed end of the post into the open end of the Marker Post Driver.
2. Insert the pointed end of the post into a prepared hole made by our Pilot Hole Driver, item 08-104, (when driven into rocky or very dense soil).
3. Hold your foot against the Marker Post to help start the post straight. This also keeps it from flexing during insertion. Drive the post into the ground to the desired depth, usually 16 to 18 inches, depending on soil type and density.

NOTE: ALWAYS wear proper safety clothing and eye protection when installing marker posts. Face oncoming traffic when installing posts alongside busy roads or highways.

WHAT EXACTLY IS *POLYFLEX*?

ROCKART *POLYFLEX*® substrate is polyethylene plastic with the text or image screen printed on a corona-treated surface. No sheeting is used, so the image will never "peel off".

***POLYFLEX*®** signs cost about one-third the price; are not typically stolen for their recycle value; are made from recycled material and will not sustain much damage from a bullet. Polyflex signs should last ten years with very little difference in appearance. If one of these signs starts looking a little dull, just wipe them off with ***ArmorAll*®** and they will look like new again. Polyflex will not survive a fire like aluminum will but neither will the vinyl sheeting on the aluminum. Polyflex is made from the same material that we use for our kiosk sign panels and can last 20+ years.

When aluminum signs are deployed in high elevations and are then exposed to extreme temperature changes may start to sheer. The sheeting and aluminum have different rates of expansion and contraction as temperatures change and may cause the adhesive layer to sheer. Over time, this leaves microscopic holes in the sheeting that if exposed to moisture will freeze & thaw, slowly causing the sheeting to eventually separate or "peel away" from the aluminum.

Many customers located in higher-elevation areas (like the Sierras) are applying our 2- or 3-inch wide clear Edge Tape (*Page 91*) to the top edge of larger signs to keep this from happening. They also apply the 3-inch tape over the decals then over the top of fiberglass posts to keep decals from peeling off. It also protects the decals from UV, which effectively doubles the lifetime. We also offer an 8oz can (with dauber) of liquid edge sealant that prevents peeling on fiberglass marker posts.

ROCKART Policies, Terms & Conditions

New Customer Accounts

A 50% deposit may be required from first-time customers that are non-government agencies.

Open accounts must be approved first; a signed credit application must be submitted with at least 3 current references.

Quotes & Estimates

To receive a free quote: Call or Fax us (see bottom of page). Most types of quotes may be submitted using our website (under 'Services' on the Main Menu).

Estimates are typically valid for thirty (30) days from date issued unless stated otherwise. We reserve the right to correct errors on our quotes. When a discrepancy occurs the revised price prevails.

Ordering

Use Item #'s (SKU's) when ordering. Orders may be placed by Phone, by Fax, sent via U.S. mail (using a copy of the order form included in this catalog); or (preferably) online at www.rockartsigns.com.

Custom Decals & Signs

We can create artwork from any previously printed materials that are printed in solid (not screened) colors. Any artwork files may be submitted from our website (under Services). Art files should be in EPS, AI, PDF or PSD format. Artwork may also be generated from a sketch. For complete art guidelines please call or email us.

One time artwork and film charges for custom decals will be quoted based on quantity ordered, number of colors, and artwork complexity.

It will be necessary to include a 50% deposit for site-specific items (graphic includes references to a specific location, office, or a phone #).

New or Custom Decals & Signs

For generic* single-color decals or signs that contain colors outside of the standard Rockart colors (see below):

Order 50-99 decals	$125.00 art charge
100-199 decals	$100.00 art charge
200-299 decals	$75.00 art charge
300+ decals	$50.00 art charge

*Generic Decals are decals that can be used in other areas and are not specific to a particular agency, organization or specific location (noted by logo usage, names, or similar wording).

For site-specific or special logo decals with one or more colors, with minimum order requirements:

$130.00 art charge for one color

+ $25.00 art charge for each additional color

"Last Minute" Artwork Revisions

Changes made to artwork after final approval must be phoned in and must be made by the person who signed the final proof (authorized party). Additional charges may apply that may be as much as the quoted order. Notification of applicable charges will be explained at the time changes are submitted.

Die Cut Charges

There are no additional die charges for decals with square cut corners. All other shapes and corners will require additional die charges. Charges are based upon size and complexity of the die.

Screen Printed Colors

All printed products contain at least one (1) color. The substrate or base material does not normally count as a color. All other colors are printed onto the substrate. Each additional decal color requires a separate piece of artwork and film. Example: A three color decal requires three separate pieces of film and artwork.

Color Matching

While we make every effort to match your custom color, we cannot guarantee an exact match. A charge of $45.00 per color will be added for custom colors or PMS colors not listed as a "Standard Rockart Color". Nonstandard colors and color matches may also require additional production time.

Standard Rockart Colors

Color samples available

White (Wht)	-00 White	Grey (Gry)	-08 PMS 430C
Brown (Brn)	-01 PMS 161C	Black (Blk)	-09 Black

Orange (Org)	-03 PMS 165C	Purple (Pur)	-11 PMS 2607C
Red (Red)	-04 PMS 485C	Tan (Tan)	-12 PMS 155C
Blue (Blu)	-05 PMS 293C	FS Cream (Crm)	-13 PMS 134C
Green (Grn)	-06 PMS 348C	Cream -	FED STD 23695
Violet (Vio)	-07 PMS 521C		

Positive/Negative Terminology

With regard to graphic elements, a "positive" image typically has a light background and a dark symbol. A "negative" image is the opposite: a dark background with light symbol.

Custom Orders

Any large custom decal order may have up to 5% over/under run during production. These variances will be charged on a pro-rated basis. Slight over runs are normal, under runs are rare. If an exact quantity is required, a small additional fee may be required.

Methods for Payment

We accept Visa, MasterCard, American Express, Electronic Transfers, Checks and Money Orders. For credit card orders, address verification from your credit card statement is necessary for your safety. Call Rockart with your credit card number, please do not fax it in.

Terms

Net 30 days, 1.5% Interest per month on all accounts past 30 days.

Merchandise is invoiced on the shipping date.

Delivery

Unless stated otherwise, all orders are shipped using United Parcel Service (UPS). A phone number & physical street address (no PO Boxes) ***must be provided*** for UPS shipments.

All shipments from Rockart Industries are F.O.B. Mesa, Arizona, 85215.

Check for damage upon arrival and make any claims to UPS within 10 days of arrival.

Rush Delivery

We will make every effort to meet your needs at no extra charge. However you may incur additional shipping charges to expedite shipment.

Rush Orders

We work hard to fill all orders in a timely fashion. If you need to have a rush placed on an order, you will be charged an additional $50.00 Expedite Fee.

Returns

There is no restocking fee if products are returned in sellable condition, within 30 days. Always include a copy of the Packing List or Invoice with a return and always CALL before you make the return to obtain return merchandise authorization (RMA).

Exceptions to this policy are:

- Items considered to be Special- or Custom-Order ***cannot*** be returned or refunded.
- Ground-Driven Marker Posts sizes of 24", 36" or 48" are considered to be Custom-Order and ***cannot*** be returned or refunded.

We reserve the right to refuse return claims after 60 days. Return authorization must be obtained from Rockart before returning any product.

Prices

Prices are subject to change without notice. Orders canceled after production has begun will be charged for any work completed up to that point.

Merchandise is billed at prices valid at time of delivery.

ROCKART, Inc. reserves the right to refuse to fill any order, at any time, for any reason.

Sales Tax

We are required to charge city and state sales tax at the applicable rate to our customers located in the State of Arizona. Only Federal Agencies will be charged on half the tax rate. If applicable to your purchase, and we have received a Form 5000A from you, taxes may be avoided.

Logos

Logos appearing in this catalog are for ordering purposes only. Their inclusion does not imply endorsement by ROCKART, Inc.

Some decals/signs that include organization / municipality logos are available for sale only to parties expressly authorized by the owners of the design.

Compliance with Regulatory Laws

Products installed in public areas and along streets may be required by law to comply with published governmental guidance & specifications outlined in publications such as **MUTCD** (Manual on Uniform Traffic Control Devices) among others (review all local & state laws).

Special consideration may be necessary for attributes such as (but not limited to): retroreflectivity, sign size, placement / location, readability, sign substrate, graphic content, phrasing, etc.

It is the ***sole responsibility*** of the BUYER/INSTALLER/END USER to understand and comply with any and all laws or other legal requirements.

UNDER NO CIRCUMSTANCE will ROCKART, Inc. be held liable or "at fault" for any damages (personal or inconsequential) resulting from any product deployed or used improperly, incorrectly or without regard to applicable laws & regulations.

Dear Sirs:

I am writing to you to congratulate you on the toughness of your "Rock Ranger" fee tube design and construction. We acquired one of these a number of years ago for a high-use fee site which we manage. It has performed excellently, not only weathering the extreme climate conditions of Montana but also withstanding a series of recently escalating attacks of thieves attempting to steal the receipts.

And when I say "escalating" and "attempts" I do mean exactly those words, since although the thieves have repeatedly tried everything from smashing the top off with sledge hammers, prying open the face with crow bars, cutting off the lock box, drilling the lock, and even dragging it away behind a vehicle, they have struck out completely and are 0/3 in the last month alone. There are some very determined but also very frustrated thieves out there somewhere and it's been almost an entertainment factor for us as well, heading out to the field in the morning, anticipating what might have happened. (Finding this Rock Ranger, with a couple of tons of cement on it, after its been dragged down a dirt road and left pretty much buried in a field is a great conversation topic and then finding the receipts still in it can really make your day).

Affectionately, this Rock Ranger has acquired the nickname of "Rocky". Sadly, "Rocky" has suffered enough damage the last time that repairing it requires more effort than replacing it. Right now our staff is out in the warehouse figuring out how to cut the fee tube out to retrieve the receipts. Perhaps we're more resourceful than the thieves because we intend to spend the receipts these losers have failed to get from "Rocky" to purchase "Rocky II" from you. And then we'll recycle as much of "Rocky" as we can; including using some of the steel as part of the increased protection features we're going to be building around "Rocky II". We'll win in the end.

Thank you

Tim Finger
